

WESLEY COLLEGE  
By daring & by doing

YEAR 12 MATHEMATICS SPECIALIST  
SEMESTER ONE 2017  
QUESTIONS OF REVIEW 2: Functions

Name: \_\_\_\_\_

Wednesday 29<sup>th</sup> March

Time: 40 minutes

Mark

/35

Calculator free.

1. [3 & 3 = 6 marks]

The graphs of  $y_1$  and  $y_2$  are shown on axes to the right.

(a) Use the graph to solve the following equations.

(i)  $y_1 = 3$

(ii)  $y_2 \geq 0$

(iii)  $y_2 < y_1$

(b) State the equation for the graph of

(i)  $y_1$

(ii)  $y_2$

---

**2. [5 marks]**

Calculate where  $y = |x - 1|$  intersects  $y = \frac{x}{2} + 4$ .  
Represent your solution on the axes provided.

**3. [5 marks]**

$f(x) = |x|$  and  $g(x) = |x + 2|$

Determine a piecewise defined expression for the sum  $f(x) + g(x)$  and sketch  $y = f(x) + g(x)$  on these axes.

---

4. [2, 2 & 6 = 10 marks]

The graphs of  $y = f(x)$  and  $y = g(x)$  are shown.

(a) Does  $f(x)$  possess an inverse function? Explain

(b) Find

(i)  $g \circ f(3)$

(ii)  $f \circ g(5)$

(c) State

(i) the domain of  $g$

(ii) the range of  $f$

(iii) the maximal range of  $f \circ g(x)$

(iv) the maximal domain of  $g \circ f(x)$

5. [2, 2, 2, 1 & 2 = 9 marks]

The axes to the right show the graph of  $g(x) = \sqrt{x+4} + 2$ .

- (a) Find the value of  $(g \circ f)(1)$  if  $f(x) = 2x - 5$ .

- (b) (i) State the range of  $g^{-1}(x)$

- (ii) State the domain of  $g^{-1}(x)$

- (c) Find the defining rule for  $g^{-1}(x)$  in simplest form.

- (d) Is  $g^{-1}(x)$  one-to-one?

- (e) On the axes above, add a sketch of the graph of  $y = g^{-1}(x)$  showing the coordinates of all relevant features clearly.
