

Trinity College

Semester Two Examination, 2017

Question/Answer booklet

**MATHEMATICS
METHODS
UNITS 3 AND 4
Section One:
Calculator-free**

--	--	--	--	--	--	--	--	--	--

Student Number: In figures

In words

Your name

Time allowed for this section

Reading time before commencing work: five minutes
Working time: fifty minutes

Materials required/recommended for this section
To be provided by the supervisor
This Question/Answer booklet
Formula sheet

To be provided by the candidate
Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: nil

Important note to candidates
No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of examination
Section One: Calculator-free	8	8	50	52	35
Section Two: Calculator-assumed	13	13	100	97	65
Total					100

Instructions to candidates

1. The rules for the conduct of Trinity College examinations are detailed in the *Instructions to Candidates* distributed to students prior to the examinations. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer booklet.
3. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
4. Additional working space pages at the end of this Question/Answer booklet are for planning or continuing an answer. If you use these pages, indicate at the original answer, the page number it is planned/continued on and write the question number being planned/continued on the additional working space page.
5. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you do not use pencil, except in diagrams.
7. The Formula sheet is not to be handed in with your Question/Answer booklet.

Additional working space

Question number: _____

Section One: Calculator-free

35% (52 Marks)

This section has **eight (8)** questions. Answer **all** questions. Write your answers in the spaces provided.

Working time: 50 minutes.

Question 1

(6 marks)

The discrete random variable X is defined by

$$p(X = x) = \begin{cases} \frac{k}{x + 1} & x = 0, 1 \\ 0 & \text{elsewhere.} \end{cases}$$

(a) Determine the value of the constant k .

(2 marks)

(b) Determine

(i) $E(5 - 3X)$.

(ii) $\text{Var}(1 + 6X)$.

(2 marks)

Use the increments formula to estimate the change in A as x increases from 7 to 7.1.

$$A(x) = \int_x^{-1} f(t) \, dt.$$

Another function $A(x)$ is given by

Part of the graph of the linear function $y = f(t)$ is shown below.

Question 8

(5 marks)

End of questions

See next page

Question 2

(6 marks)

- (a) Determine k , if $2 \log_4 6 - \log_4 3 + 1 = \log_4 k$.

(3 marks)

- (b) Determine the exact solution to $3(4)^{x-1} = 18$.

(3 marks)

See next page

Question 7

(7 marks)

A function is defined by $f(x) = \frac{1 + \ln x}{-2x}$.

- (a) State the natural domain of f .

(1 mark)

- (b) Show that $f'(1) = 0$.

(3 marks)

- (c) Use the second derivative test to determine the nature of the stationary point of the function at $x = 1$.

(3 marks)

See next page

Question 3

(7 marks)

The rate of change of displacement of a particle moving in a straight line at any time t seconds is given by

$$\frac{dx}{dt} = 3 + 2e^{0.1t} \text{ cm/s.}$$

Initially, when $t = 0$, the particle is at A , a fixed point on the line.

- (a)
- Calculate the initial velocity of the particle.
- (1 mark)

- (b)
- Determine the distance of the particle from A after 20 s.
- (3 marks)

- (c)
- Determine when the acceleration of the particle is 7 cm/s^2 .
- (3 marks)

Question 6

(6 marks)

The functions f and g intersect at the point $(-1, 7)$.

The first derivatives of the functions are $f'(x) = 30(5x + 7)^2$ and $g'(x) = 10\pi \sin(\pi(1 - 2x))$.

Determine an expression for each function.

See next page

See next page

Question 4

(7 marks)

The graph of $y = f(x)$, $x \geq 0$, is shown below, where $f(x) = \frac{4x}{x^2 + 3}$.

- (a) Determine the gradient of the curve when $x = 2$.

(3 marks)

- (b) Determine the exact area bounded by the curve $y = f(x)$ and the lines $y = 0$ and $x = 2$, simplifying your answer.

(4 marks)

See next page

Question 5

(8 marks)

A curve has first derivative $\frac{dy}{dx} = 6x(x - 2)$ and passes through the point $P(-1, -8)$.

- (a) Determine the value(s) of x for which $\frac{d^2y}{dx^2} = 0$.

(2 marks)

- (b) Sketch the curve on the axes below, clearly indicating the location of all axes intercepts, stationary points and points of inflection.

(6 marks)
