

Semester One Examination, 2016

Question/Answer Booklet

**MATHEMATICS
METHODS
UNIT 3 and 4**

**Section One:
Calculator-free**

If required by your examination administrator, please
place your student identification label in this box

Student Number: In figures

--	--	--	--	--	--	--	--

In words

--	--	--	--	--	--	--	--

Your name

--	--	--	--	--	--	--	--

Time allowed for this section

Reading time before commencing work: five minutes
Working time for section: fifty minutes

Materials required/recommended for this section

To be provided by the supervisor
This Question/Answer Booklet
Formula Sheet

To be provided by the candidate

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction
fluid/tape, eraser, ruler, highlighters

Special items: nil

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that
you do not have any unauthorised notes or other items of a non-personal nature in the
examination room. If you have any unauthorised material with you, hand it to the supervisor
before reading any further.

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	8	8	50	48	35
Section Two: Calculator-assumed	13	13	100	101	65
Total			149	100	

Instructions to candidates

1. The rules for the conduct of Trinity College examinations are detailed in the *Instructions to Candidates* distributed to students prior to the examinations. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer Booklet.
3. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
4. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.
5. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you **do not use pencil**, except in diagrams.
7. The Formula Sheet is **not** to be handed in with your Question/Answer Booklet.

Additional working space

Question number: _____

Question 1

(5 marks)

Part of the graph of $y = x^2 + 1$ is shown in the diagrams below.

An approximation for the area beneath the curve between $x = 0$ and $x = 4$ is made using rectangles as shown in the right-hand diagram. Determine the exact amount by which the approximate area exceeds the exact area.

See next page

See next page

(c) State the global minimum of $f(x)$. (1 mark)

(b) Use the second derivative test to determine the nature of the stationary point found in (a). (3 marks)

(a) Determine the coordinates of the stationary point of $f(x)$. (3 marks)

Consider the function defined by $f(x) = \frac{x}{2} - \sqrt{x}$, $x \geq 0$.

End of questions

See next page

Question 2 (9 marks)

(a) Differentiate the following with respect to x . Do not simplify your answer.

(i) $y = \int_1^x (t - t^2) dt.$ (2 marks)

(ii) $y = \frac{\sin(2x+1)}{e^{-x}}.$ (3 marks)

(b) Determine the values of the constants a , b and c , given that $f'(x) = e^{bx}(ax^2 + bx + c)$ when $f(x) = x^2e^{bx}.$ (4 marks)

See next page

Question 7 (6 marks)

The discrete random variable X has the probability distribution shown in the table below.

x	0	1	2	3
$P(X = x)$	$\frac{2a^2}{3}$	$\frac{1-3a}{3}$	$\frac{1+2a}{3}$	$\frac{4a^2}{3}$

Determine the value of the constant a .

See next page

See next page

See next page

(a) Differentiate $y = \frac{e^x}{2x+1}$, simplifying your answer. (3 marks)

Question 6 (5 marks)

(b) Evaluate $\int_2^4 \left(1 - \frac{e^x}{2x} \right) dx.$ (2 marks)

has a stationary point at (4, 8). Determine $f'(10).$

A function $f(x)$ is such that $\frac{df}{dx} = ax^3 - 12x$, where a is a constant and the graph of $y = f(x)$

Question 3 (6 marks)
