

**Semester Two Examination, 2021**

**Question/Answer booklet**

**MATHEMATICS  
SPECIALIST  
UNITS 1&2**

**Section Two:  
Calculator-assumed**

Teacher \_\_\_\_\_

Your name \_\_\_\_\_

**Time allowed for this section**

Reading time before commencing work: ten minutes  
Working time: one hundred minutes

Number of additional  
answer booklets used  
(if applicable):

**Materials required/recommended for this section**

***To be provided by the supervisor***

This Question/Answer booklet  
Formula sheet (retained from Section One)

***To be provided by the candidate***

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: drawing instruments, templates, notes on two unfolded sheets of A4 paper, and up to three calculators, which can include scientific, graphic and Computer Algebra System (CAS) calculators, are permitted in this ATAR course examination

**Important note to candidates**

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

## Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of examination
Section One: Calculator-free	8	8	50	50	35
Section Two: Calculator-assumed	13	13	100	92	65
<b>Total</b>					<b>100</b>

## Instructions to candidates

- The rules for the conduct of examinations are detailed in the school handbook. Sitting this examination implies that you agree to abide by these rules.
- Write your answers in this Question/Answer booklet preferably using a blue/black pen. Do not use erasable or gel pens.
- You must be careful to confine your answers to the specific question asked and to follow any instructions that are specific to a particular question.
- Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
- It is recommended that you do not use pencil, except in diagrams.
- Supplementary pages for planning/continuing your answers to questions are provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.
- The Formula sheet is not to be handed in with your Question/Answer booklet.

## Section Two: Calculator-assumed

65% (92 Marks)

This section has **thirteen** questions. Answer **all** questions. Write your answers in the spaces provided.

Working time: 100 minutes.

---

## Question 9

(6 marks)

- (a) Determine the vector projection of  $\begin{pmatrix} 5 \\ -5 \end{pmatrix}$  on  $\begin{pmatrix} -1 \\ 2 \end{pmatrix}$ .

(2 marks)

- (b) Determine the value(s) of  $t$  so that the vectors  $\begin{pmatrix} t \\ -3 \end{pmatrix}$  and  $\begin{pmatrix} 3t+8 \\ 1 \end{pmatrix}$  are

- (i) parallel.

(2 marks)

- (ii) perpendicular.

(2 marks)

**Question 10****(7 marks)**

- (a) Five-digit odd numbers are to be made using the digits 1, 2, 3, 4, 5, 6 and 7. Determine how many such numbers exist if the number must exceed 50 000 and no digit may be used more than once in a number. (3 marks)

- (b) The library in a small guesthouse has 32 different books, of which 21 are non-fiction and the remainder fiction. Determine the number of different ways that a guest can select four books if they want

- (i) the same number of fiction and non-fiction books. (2 marks)

- (ii) more fiction than non-fiction books. (2 marks)

**Question 11**

**(7 marks)**

Two transformation matrices are  $M = \begin{bmatrix} 0 & 1 \\ 1 & 0 \end{bmatrix}$  and  $N = \begin{bmatrix} 2 & 2 \\ -4 & 4 \end{bmatrix}$ .

Triangle  $PQR$  has an area of  $39 \text{ cm}^2$ , with vertices at  $P(5,3)$ ,  $Q(-2,8)$  and  $R(-5,-1)$ .

- (a) Determine the coordinates of  $PQR$  after the triangle has been transformed by matrix  $M$ .  
(3 marks)

- (b) Use the geometric transformation to explain why the determinant of  $M$  is 1. (1 mark)

- (c) Use the geometric transformation to explain why  $M^2 = I$ , where  $I$  is the  $2 \times 2$  identity matrix. (1 mark)

- (d) Determine the area of  $PQR$  after the triangle has been transformed by matrix  $N$ . (2 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

## Question 12

(8 marks)

- (a) Write the converse of the true statement 'if a figure is a square then it has four congruent sides' and use an example or counter-example to briefly discuss the truth of the converse. (2 marks)

- (b) Points  $A, B, C$  and  $D$  lie as shown on a circle with centre  $O$  so that  $AD$  is a diameter,  $AB = CD$  and  $\angle COD = 42^\circ$ .

Determine the size of

- (i)  $\angle CAD$ . (1 mark)

- (ii)  $\angle BAD$ . (1 mark)

- (iii)  $\angle CAB$ . (1 mark)

- (c) Two chords of a circle,  $LM$  and  $PQ$ , intersect at  $N$  so that  $LM = 41$  cm,  $NM = 20$  cm and  $PQ = 44$  cm. Determine all possible lengths of  $QN$ . (3 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

**Question 13****(8 marks)**

In triangle  $OAB$ ,  $P$  is the midpoint of  $OA$  and  $M$  is the midpoint of  $PB$ . Let  $\overrightarrow{OA} = a$  and  $\overrightarrow{OB} = b$ .

- (a) Show that  $\overrightarrow{OM} = \frac{1}{4}a + \frac{1}{2}b$ . (2 marks)

The position vector of  $A$  is  $\begin{pmatrix} 6 \\ 4 \end{pmatrix}$ , position vector of  $B$  is  $\begin{pmatrix} 7 \\ -4 \end{pmatrix}$  and  $O$  is the origin.

- (b) Determine a unit vector  $\hat{u}$  in the same direction as  $\overrightarrow{OM}$ . (2 marks)

- (c) Show that  $OA$  is perpendicular to  $PM$ . (2 marks)

(d) Determine the size of  $\angle AOB$ .

(2 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

## Question 14

(7 marks)

- (a) In trapezium  $ABCD$ ,  $AC$  and  $BD$  are diagonals, and  $AB$  is parallel to  $CD$ . Use a vector method to prove that  $\vec{AC} + \vec{DB} = \vec{AB} + \vec{DC}$ . (3 marks)

- (b) In rectangle  $OPQR$ , let  $\vec{OP} = p$  and  $\vec{OR} = r$ . Use a vector method to prove that if the diagonals  $OQ$  and  $PR$  are perpendicular, then  $OPQR$  is a square. (4 marks)

**Question 15****(6 marks)**

Consider the following statement:

For two integers  $a, b$  if  $3a^2 - 2b^2$  is a multiple of 4 then at least one of  $a, b$  is even.

(a) Write the contrapositive of the statement. (1 mark)

(b) Prove that the statement is true. (5 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

**Question 16****(8 marks)**

The height of the tide,  $h$  cm, of the sea above the mean level at time  $t$  hours after midnight one day is given by

$$h(t) = 28 \cos\left(\frac{\pi t}{6}\right) + 45 \sin\left(\frac{\pi t}{6}\right).$$

- (a) Express  $h$  in the form  $a \cos(bt - \theta)$ , where  $a, b > 0$  and  $0 \leq \theta < 2\pi$ . (3 marks)

- (b) Determine, to the nearest minute, the time of the first high tide. (2 marks)

- (c) Sketch the graph of the height of the tide on the axes below. (3 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

**Question 17****(7 marks)**

Three forces  $F_1$ ,  $F_2$  and  $F_3$  act on a small body, where  $F_1 = 4i - 10j$  N,  $F_2 = -8i + 16j$  N and  $F_3 = 9i - 15j$  N.

- (a) Determine the magnitude of the resultant force and the angle between the resultant force and the vector  $i$ . (3 marks)

- (b) Two of the forces,  $F_2$  and  $F_3$ , can be multiplied by scalars  $\lambda$  and  $\mu$  respectively so that the three forces are in equilibrium. Determine the value of  $\lambda$  and the value of  $\mu$ . (4 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

**Question 18****(7 marks)**

- (a) 90 people are asked to choose two different letters from those in the word GAMBLER and write them down in order. Use the pigeonhole principle to prove that at least three people will write the same pair of letters in the same order. (3 marks)

- (b) Three character codes, such as TCU, are made using three different letters chosen from the word DISCOUNT. Determine the proportion of all possible codes that start with a D or end with a T. (4 marks)

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

**Question 19****(7 marks)**

Airport B lies 170 km due east of airport A, and in the region of the airports a wind of 25 km/h is blowing from the northeast.

A small plane, with a cruising speed of 120 km/h, leaves airport A. The pilot, not aware of the wind and intending to fly to airport B, steered the plane on a bearing of  $090^\circ$ .

Assuming that the pilot does not realise their mistake, determine how close the plane will come to airport B if it continues to fly for several hours on the same bearing.

DO NOT WRITE IN THIS AREA AS IT WILL BE CUT OFF

**Question 20****(7 marks)**

Triangle  $ABC$  has vertices  $A(2,2)$ ,  $B(-4,6)$  and  $C(4,8)$ .

$ABC$  is rotated clockwise  $60^\circ$  about the origin to form triangle  $A'B'C'$ .

- (a) Determine the coordinates of  $C'$ . (2 marks)

$ABC$  is reflected in the line  $y=2x$  to form triangle  $A''B''C''$ .

- (b) Determine the coordinates of  $B''$ . (2 marks)

- (c) Determine matrix  $T$  that will transform  $A'B'C'$  to  $A''B''C''$ . (3 marks)

**Question 21**

(7 marks)

The diagram, not drawn to scale, shows vertices  $A, B$  and  $D$  of an isosceles triangle lying on a circle so that  $AD = AB$ .

Lines  $CE$  and  $CF$  are tangential to the circle at  $D$  and  $B$  respectively.

$ABCE$  is a cyclic quadrilateral.

Let  $\angle FCE = x$ .

- (a) Determine, with reasons, the size of  $\angle AEC$  in terms of  $x$ .

(5 marks)

- (b) Hence determine the range of values for the size of  $\angle AEC$  in degrees.

(2 marks)
