Question	Mark	Max	Question

No other items may be taken into the examination room. It is Your responsibility to ensure that you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

Important note to candidates

Special items: nil

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, ruler, highlighters

To be provided by the candidate

Formula sheet

This Question/Answer booklet

To be provided by the supervisor

Materials required/recommended for this section

Reading time before commencing work: five minutes

Working time: five minutes

Time allowed for this section

Question/Answer booklet

Semester One Examination, 2023

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of examination
Section One: Calculator-free	6	6	50	50	34
Section Two: Calculator-assumed	12	12	100	97	66
Total					100

Instructions to candidates

1. The rules for the conduct of the Western Australian Certificate of Education ATAR course examinations are detailed in the *Year 12 Information Handbook 2016*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer booklet.
3. You must be careful to confine your answers to the specific questions asked and to follow any instructions that are specific to a particular question.
4. Additional pages for the use of planning your answer to a question or continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number.
5. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you **do not use pencil**, except in diagrams.
7. The Formula sheet is **not** to be handed in with your Question/Answer booklet.

		P states condition needed to exist
		P states required domain and range
		P concludes that does not exist.
		Specific behaviours
		The therefore does not exist over natural domain.
		$y \geq 0 \nRightarrow x \neq 3$
		$x^y \in d^y ?$
		$f \circ g(x)$
		c

b) Does $f \circ g(x)$ exist over the natural domain of $g(x)$? Explain. (3 marks)

	P states range
	P states domain
	Specific behaviours
	$x^y : y \geq 0$
	$d^y : x \geq -\frac{5}{2}$
	c

a) Determine the natural domain and range of $g(x)$.
 Consider the functions $f(x) = \frac{x-3}{1}$ and $g(x) = \sqrt{2x+5}$. (2 marks)

(8 marks)

Question 1

Working time: 50 minutes.

- number of the question that you are continuing to answer at the top of the page.
- original answer space where the answer is contained, i.e. give the page number. Fill in the continuing an answer. If you need to use the space to continue an answer, indicate this clearly at the top of the page.
 - Planning: if you use the spare pages for planning, indicate this clearly at the top of the page.
- responses and/or as additional space if required to continue an answer.

Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.

This section has **seven (7)** questions. Answer all questions. Write your answers in the spaces provided.

Section One: Calculator-free (50 Marks)

CALCULATOR-FREE 3 **SPECIALIST MATHEMATICS**

CALCULATOR-FREE

18

SPECIALIST MATHEMATICS

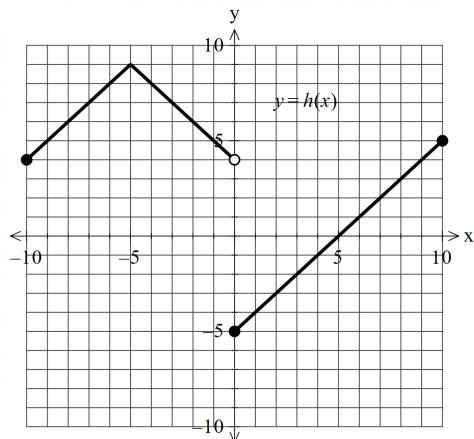

Working out space.

- c) Determine $f \circ f(x)$ and its natural domain. (3 marks)

c
$f \circ f(x) = \frac{1}{\frac{1}{x-3} - 3} = \frac{x-3}{10-3x}$
$d : x \neq 3, x \neq \frac{10}{3}$
Specific behaviours
P obtains an expression for function P simplifies as shown above P states domain

Question 2 (8 marks)

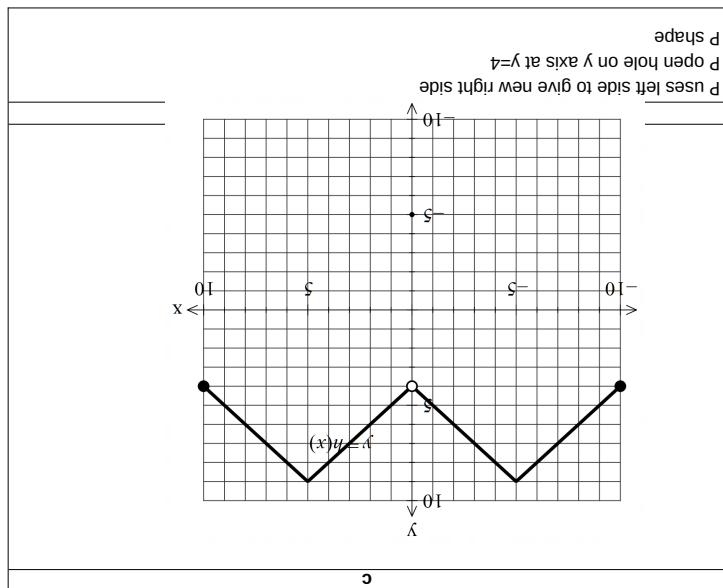

Consider the function $y = h(x)$ which is graphed below.

- a) Solve for $|h(x)| = 5$. (2 marks)
- | |
|--|
| c |
| $x = -9, -1, 0, 10$ |
| Specific behaviours |
| P states two correct values of x
P states all values only |

See next page

See next page

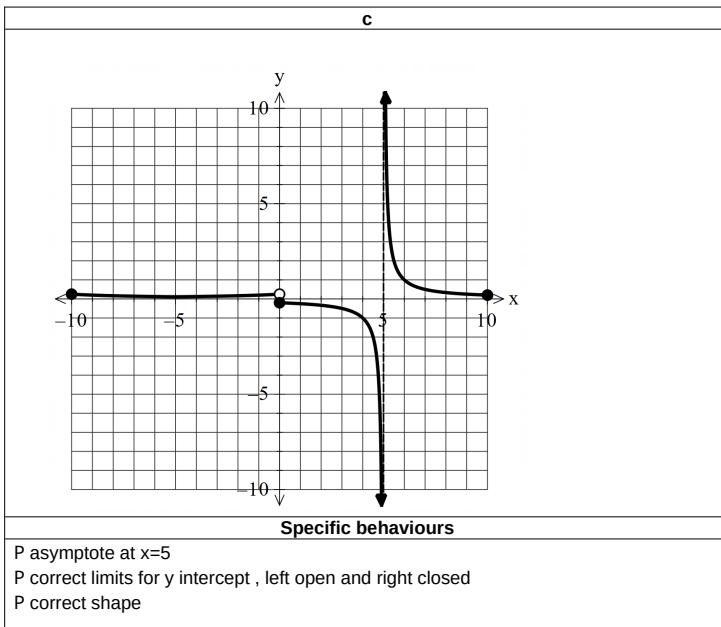

(3 marks)

b) Sketch $y = h(|x|)$ on the axes below.

Working out space.
End of section one

- c) Sketch $y = \frac{1}{h(x)}$ on the axes below. (3 marks)

**Question 3**

(8 marks)

Consider the following planes:

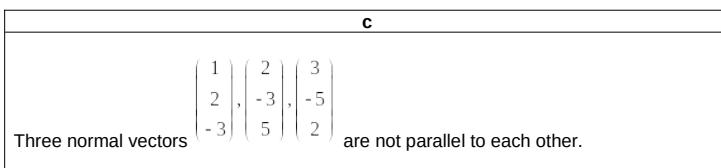

$$x + 2y - 3z = 10$$

$$2x - 3y + 5z = -26$$

$$3x - 5y + 2z = -36$$

- a) Show that none of these planes are parallel.

(2 marks)

See next page

The rays MC and MB form angles of $\frac{\pi}{3}$ with the positive direction of the real axis.

Let C be the complex number z_C , and B be the complex number z_B .

- (c) Determine, in polar form, z_C . (3 marks)

$$\angle OMC = \frac{2\pi}{3} \Rightarrow \arg z_C = \frac{\pi}{6}$$

$$|z_C| = \sqrt{1^2 + 1^2 - 2 \cos \frac{2\pi}{3}} = \sqrt{3}$$

$$\text{Hence } z_C = \sqrt{3} \operatorname{cis} \frac{\pi}{6}$$

Specific behaviours

- ✓ Determines $\angle OMC$.
- ✓ Uses cosine rule to determine the modulus.
- P Determines argument of z_C and states z_C in polar form.

- (d) Explain why $\overline{z_C} = z_C \operatorname{cis} \left(\frac{-\pi}{3} \right)$. (2 marks)

Solution	Specific behaviours
$\overline{z_C}$ is the same as $z_B \wedge \text{red}$ z_B is z_C rotated $\frac{\pi}{3}$ clockwise $\text{Hence } \overline{z_C} = z_C \operatorname{cis} \left(\frac{-\pi}{3} \right)$	<ul style="list-style-type: none"> ✓ States that $\overline{z_C} = z_B$. ✓ States that z_B is z_C rotated $\frac{\pi}{3}$ clockwise.

See next page

Determine all possible values of $p \neq q$ such that there are:

- (i) No solutions.
- (ii) Infinite solutions.
- (iii) A unique solution.

$$\begin{aligned} 3x - 5y + 2z &= -36 \\ 2x - 3y + qz &= -26 \\ x + 2y - 3z &= p \end{aligned}$$

- c) Consider the system of equations below with $p \neq q$ being constants. (3 marks)

P states all 3 variables
P eliminates two variables from the one equation
P eliminates one variable from an equation

Specific behaviours

$$\begin{array}{|ccc|} \hline & & \\ \text{so in } & & \\ & & \\ \hline & & \\ -3 & & \\ & & \\ \hline x + 10 + 3 & = 10, x & = -3 \\ 35 - 11z & = 46, z & = -1 \\ -4y & = -20, y & = 5 \\ 0 & -4 & 0 & -20 \\ 0 & 7 & -11 & 46 \\ 1 & 2 & -3 & 10 \\ 0 & 11 & -11 & 66 \\ 0 & 7 & -11 & 46 \\ 1 & 2 & -3 & 10 \\ (3 & -5 & 2 & -36) \\ 2 & -3 & 5 & -26 \\ 1 & 2 & -3 & 10 \\ \hline \end{array}$$

c)

- b) Solve the system of simultaneous equations. (3 marks)

P translates by loci right 1 unit.
P states locus representing circle.

P States locus restricting the argument.
P States locus representing the circle.

Specific behaviours

$$|z - 1| = 1 \cup -\frac{\pi}{2} \leq \arg(z - 1) \leq \frac{\pi}{2}$$

c	
$\begin{bmatrix} 1 & 2 & -3 & p \\ 2 & -3 & q & -26 \\ 3 & -5 & 2 & -36 \end{bmatrix}$	
$\begin{bmatrix} 1 & 2 & -3 & 10 \\ 0 & 7 & -6 & q & 2p+26 \\ 0 & 11 & -11 & 3p+36 \end{bmatrix}$	
$\begin{bmatrix} 1 & 2 & -3 & 10 \\ 0 & 7 & -16 & q & 2p+26 \\ 0 & 0 & 11 & 11q & p+34 \end{bmatrix}$	
no so $\ln s, q = 1$ & $p \neq -34$	
inf init $q = 1$ & $p = 34$	
unique $q \neq 1$	
Specific behaviours	
P obtains a line with two zeros	
P states values for uniqueness	
P state values for infinite and no solns	

Question 4 (7 marks)

Consider the three complex numbers plotted below in the Argand diagram.

- a) Determine the complex number z_2 in exact cartesian form. (2 marks)

$$3cis\frac{3\pi}{18} = 3\left(\frac{\sqrt{3}}{2} + i\frac{1}{2}\right)$$

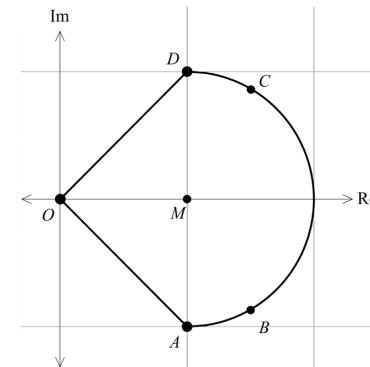

Specific behaviours	
P converts to polar	
P converts to exact cartesian	

See next page

P equates to x
P states one value in terms of a
P states two values in terms of a and zero

Question 6 (9 marks)

The Argand diagram below shows a right-angled triangle AOD , with semicircle $ABCD$ centred at M .

- (a) Given A represents the complex number $1-i$, determine the complex number representing D . (1 mark)

c	
$1+i$	
Specific behaviours	
PStates D in rectangular form.	

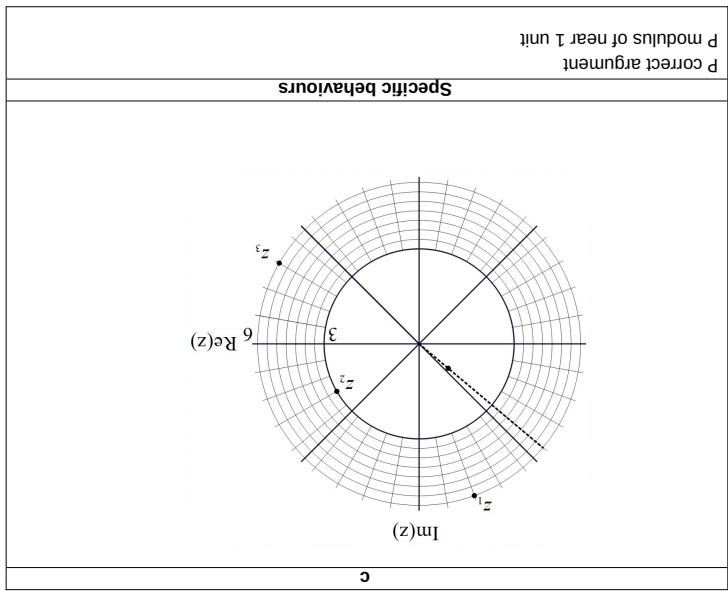

- (b) State the locus of points that define semicircle $ABCD$. (3 marks)

--

See next page

See next page	
Specific behaviours	
$\begin{aligned} \frac{36\sqrt{3}\operatorname{cis}\left(\frac{4}{x}\right)}{3\sqrt{2}\operatorname{cis}\left(\frac{6}{x}\right)} &= \frac{\sqrt{3}(6)\operatorname{cis}\left(\frac{18}{x}\right)}{-11x^2(6)\operatorname{cis}\left(\frac{6}{x}\right)} \\ (1+i)^2 &= \sqrt{2}\operatorname{cis}\left(\frac{4}{x}\right)3\operatorname{cis}\left(\frac{6}{x}\right) \end{aligned}$	

- c) State the modulus and argument of $\frac{\sqrt{3}\operatorname{cis}\left(\frac{4}{x}\right)}{(1+i)^2}$. (3 marks)

- b) Plot the complex number $z_1 \times z_2$ on the axes above. (2 marks)

See next page	
Specific behaviours	
$\begin{aligned} x = 0, \pm \sqrt{a} \\ x(ax^2 - 1) = 0 \\ ax^2 - x = 0 \\ ax^2 = x \end{aligned}$	

- d) Determine the x values in terms of a for where $y(x) = g(x)$. (3 marks)

P states that function is one to one	
As function is one to one it does have an inverse	
C	

- c) Does $g(x) = ax^3$ have an inverse function? Explain. (2 marks)
- Consider the function $y = ax^3$ where a is a positive constant.

P swaps x and y and solves for y	
P discards positive value and chooses negative	
P states domain and rule	
$\begin{aligned} d : x \leq 1 \\ f_1(x) = 3 - \sqrt[3]{x-1} \\ \text{as } y \leq 1 \\ y = \frac{6 \mp \sqrt{12x-12}}{6 \mp 2\sqrt[3]{3(x-1)}} \\ y = \frac{6}{6 - \sqrt[3]{36 - 4(3)(4-x)}} \\ 3y^3 - 6y + 4 - x = 0 \\ x = 3y^3 - 6y + 4 \end{aligned}$	$f(x) = 3x^2 - 6x + 4$

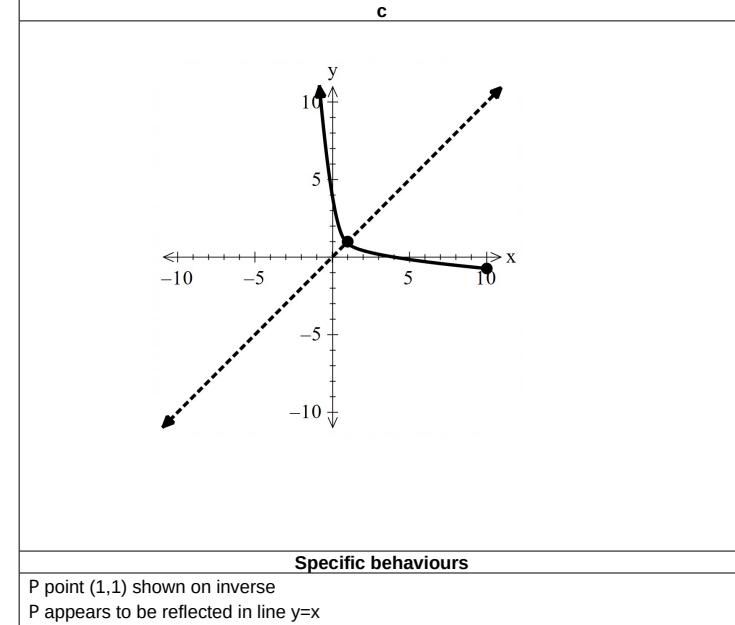

P converts to polar form for each value
 P states modulus, un-simplified
 P states argument un-simplified

Question 5 (10 marks)

Consider the function $f(x) = 3x^2 - 6x + 4, \quad x \leq 1$ which is graphed below.

- a) On the axes above, plot $f^{-1}(x)$.

(2 marks)

- b) Determine the rule for $f^{-1}(x)$ and state its domain.

(3 marks)

c
