

No other items may be taken into the examination room. It is your responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

Special items: drawing instruments, templates, notes on two unfolded sheets of A4 paper, and up to three calculators approved for use in the WACE examinations.

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid, erasers, ruler, highlighters, correction tape/fluid, pens (blue/black preferred), pencils (including coloured), sharpener,

### Instructions to candidates

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2017*. Sitting this examination implies that you agree to abide by these rules.
2. Answer the questions according to the following instructions.

**Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.

It is recommended that you **do not use pencil**, except in diagrams.

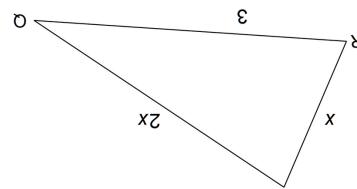

3. You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
4. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
  - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
  - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.
5. The Formula Sheet is **not** handed in with your Question/Answer Booklet.

(3 marks)

- (b) If  $x = 2.4$  units, calculate the size of angle Q and hence or otherwise the area of triangle PQR.

(2 marks)

(a) Show that  $\cos Q = \frac{4x}{x^2 + 3}$

In the triangle PQR given below,  $PR = x$  units,  $PQ = 2x$  units and  $RQ = 3$  units.

Question 10 (5 marks)

Working time: 100 minutes

- This section has **fourteen (14)** questions. Attempt all questions. Write your answers in the spaces provided.
- Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
  - Continuing an answer: If you need to use the space to continue an answer, fill in the number of the question(s) that you are continuing to answer at the top of the page.
  - Answer space: Give the page number, i.e. give the page number, if you need to use the space to continue an answer.

Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.

Additional working space

Section Two: Calculator-assumed

65% (100 marks)

**Question 11 (4 marks)**

Consider the function  $y = ax^2 + 2x + a$ .

- (a) State the coordinates of the turning point of the graph of  $y = ax^2 + 2x + a$  in terms of  $a$ .  
(2 marks)

- (b) For which values of  $a$  does the graph of  $y = ax^2 + 2x + a$  have two  $x$ -intercepts? (2 marks)

Question number(s): .....

**Question 13 (5 marks)**

The instantaneous rate with which the cost ( $C$ ) in cents of a certain share on the Australian Stock

Exchange changes with respect to time,  $t$  (weeks), is modelled by  $\frac{dC}{dt} = t^2 - t - 12$  for the period  $0 \leq t \leq 15$ . The initial cost of the share was 105 cents.

- (a) Determine the cost of the share during the second week, when  $t = 2$ . (2 marks)

- (b) State the minimum cost for this particular share and when did this occur? (2 marks)

- (c) During which week does the cost of the share exceed its initial cost for the first time?  
(1 mark)

(2 marks)

If an arithmetic sequence has a first term of 17 and a common difference of 3, find the 10th term.

(2 marks)

(e)

(2 marks)

III) -2, -6, -18, ...

(2 marks)

$$3 - \sqrt{2}, 3, 3 + \sqrt{2}, 3 + 2\sqrt{2}, \dots$$

(d) Use Calculus methods to find the maximum displacement of the ski from the buoy and when this occurs.

Question 15 (6 marks)

aa) State the recursive rule for the following sequences:

(2 marks)

(q)

2 marks)

(c)

If Mr Vincent, whose height is 1.6 m, climbs to the top of Reabald Hill which is 85 m above sea level, how far, to the nearest kilometre, would he be able to see? (3 marks)

(1 mark)

(q)

The distance to the horizon ( $d$ ) which can be observed is directly proportional to the square root of the height of the observer ( $h$ ) above sea level such that  $d \propto \sqrt{h}$ .

A jet ski moves in a straight line past a buoy so that its displacement from the buoy is modelled by the function  $s = -\frac{t^3}{2} + \frac{t^2}{4} + 20t$ , where  $s$  is measured in metres and  $t$  is in seconds for  $0 \leq t \leq 8$ .  
 (a) How far does the jet ski move from the buoy in the first 3 seconds? (1 mark)

Question 14 (5 marks)

MATHEMATICS METHODS UNIT 1 a

1

CALCULATOR-ASSUMED

CALCULATOR-ASSUMED

14

**Question 16 (9 marks)**

- (a) Consider  $f(x) = \frac{1}{2}x^2$  where  $x = 3$ . Find  $\lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}$  by completing the table below. (3 marks)

$h \rightarrow 0$	Limit =
0.1	
0.01	
0.0001	
0.000001	

- (b) Evaluate the following limit  $\lim_{h \rightarrow 0} \frac{3(x+h)^2 - 3x^2}{h}$ .  
(Hint: Identify the function being differentiated.)

(2 marks)

- (c) The function  $g(x) = 2x^2 + kx + 7$  has a stationary point at  $x = 3$ . Find the value of  $k$ . (2 marks)

- (d) If the gradient of the tangent at a point  $(x, y)$  on a curve is given by  $4x + 1$  and the curve passes through  $(1, -2)$ , find the equation of the curve. (2 marks)

**Question 21 (13 marks)**

- (a) Consider the sequence  $A_n = \frac{1}{2} \times 3^n$ .

- (i) State the first 3 terms of the sequence. (1 mark)

- (ii) State its recursive formula. (2 marks)

- (iii) Find the sum of the first 25 terms to four significant figures. (2 marks)

- (b) The number of people using a Health App on their mobile phones doubles every month. At the beginning of the first month there were 6 users.

- (i) How many users were there after 1 year (i.e. at the end of month 12)? (2 marks)

- (ii) After how long would there be 1 million users? (2 marks)

- (iii) Each user buys the app for \$1.15. During which month would the revenue from selling the app exceed \$6 million? (2 marks)

- (c) The recurring decimal  $0.454545\dots$  can be written as the geometric progression  $\frac{45}{100} + \frac{45}{10000} + \frac{45}{1000000} \dots$ .

- Write  $0.454545\dots$  as a common fraction by finding the sum of the progression to infinity. (2 marks)

A rectangular pool has the following dimensions (in metres): the length is  $3x$ , the width is  $90 - 3x$  and the depth is  $\frac{x}{3}$ .

(a) Show that the volume is given by  $V(x) = 90x^2 - 3x^3$ .

(2 marks)

(a) Evaluate the following and leave your solution in standard form (scientific notation).

$$\sqrt[4]{m} \quad \text{if } m = 1.44 \times 10^6 \text{ and } n = 2 \times 10^{-2}$$

(3 marks)

(b) The number of bacteria,  $P$ , in a culture increases with time, in hours, according to the

(b) Use calculus methods to determine the maximum volume of the pool and the dimensions of the pool to achieve this maximum.

(4 marks)

(i) Determine the values of  $P_0$  and  $r$ .

(2 marks)

(ii) How many bacteria would there be after 12 hours?

(1 mark)

(iii) Determine, to the nearest minute, when the number of bacteria will reach 1 000 000.

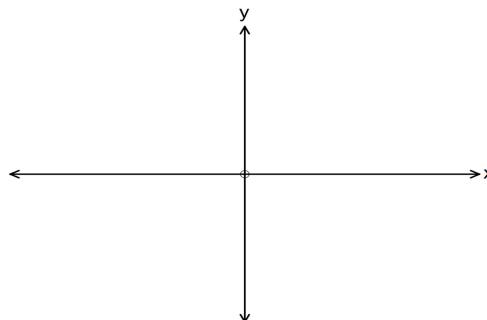

(2 marks)

**Question 18 (6 marks)**

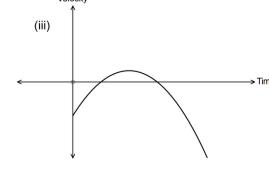

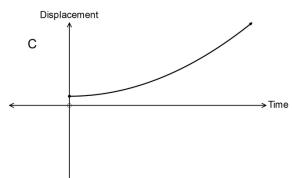

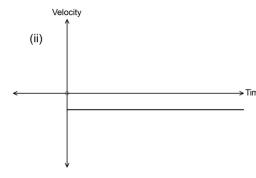

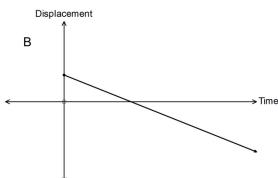

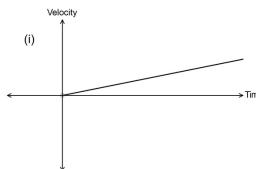

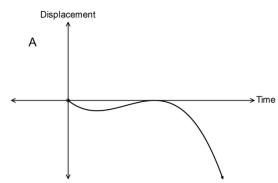

- (a) Sketch a graph with the following features on the axes below:

$$\begin{aligned}f(0) &= 0 & f(-2) &= 0 \\f'(-1) &= f'(2) = 0 & f''(2) &= 0 \\f'(x) > 0 & \text{ for } -1 < x < 2 \cup x > 2\end{aligned}$$

(3 marks)

- (b) Match the displacement – time graphs to their velocity-time graphs and complete the table below.

A	B	C

**Question 19 (10 marks)**

- (a) An outdoor movie theatre in Perth arranges its seats so that there are 26 seats in row A, 28 seats in row B, 30 seats in row C and so on.

- (i) How many seats in row M?

(2 marks)

- (ii) Which row has 70 seats?

(1 mark)

- (ii) The final row is row X. How many seats are in the outdoor theatre? (1 mark)

- (b) The sum of the first 10 terms in an arithmetic sequence is 205 and the sum of the first 20 terms is 710. Determine the sum of the first 30 terms. (3 marks)

- (c) Evaluate the arithmetic series
- $254 + 251 + 248 + \dots + 176$
- . (3 marks)
