No other may be taken into the examination room. It is your responsibility to ensure that you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

Important note to candidates

Special items: drawing instruments, templates, notes on two unfolded sheets of A4 paper, and up to three calculators approved for use in this examination

What are provided by the stationary? Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Materials required/recommended for this section
To be provided by the supervisor
This is a question/answer booklet
Formula sheet (detained from Section One)

Time allowed for this section	Reading time before commencing work:
ten minutes	one hundred minutes

Question number: _____

Instructions to candidates

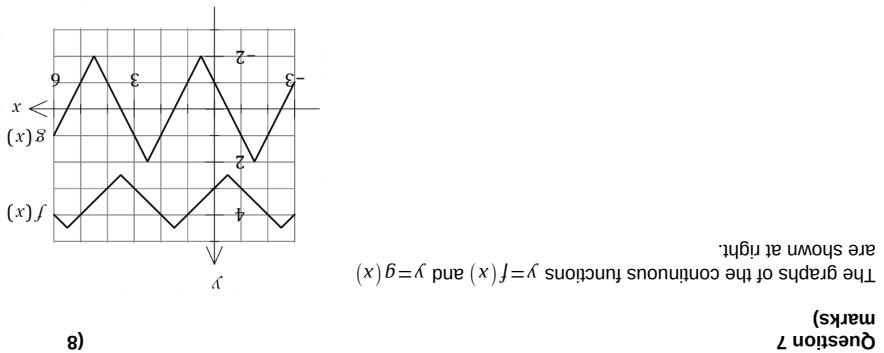

1. The rules for the conduct of the Western Australian Certificate of Education ATAR course examinations are detailed in the *Year 12 Information Handbook 2019*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer booklet.
3. You must be careful to confine your answers to the specific questions asked and to follow any instructions that are specific to a particular question.
4. Additional pages for the use of planning your answer to a question or continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number.
5. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you **do not use pencil**, except in diagrams.
7. The Formula sheet is **not** to be handed in with your Question/Answer booklet.

Solution $\frac{d}{dx} f(g(x)) _{x=5} = f'(5) \times g'(5) \times f'(-1) \times g'(-1) + 2$	<input checked="" type="checkbox"/> Indicates correct application of chain rule <input checked="" type="checkbox"/> Indicating correct value of $f'(5)$ <input checked="" type="checkbox"/> Correctly evaluates derivative
---	--

(b) Evaluate the derivative of $f(g(x))$ at $x=5$. (3 marks)

Solution $\frac{d}{dx} f(g(x)) _{x=-2} = f'(-2) \times g'(-2) + f'(-2) \times g'(-2) + f'(-1) \times g'(-1) + 4 \times g'(-2)$	<input checked="" type="checkbox"/> Correctly evaluates derivative <input checked="" type="checkbox"/> Indicates correct application of the product rule <input checked="" type="checkbox"/> Specific behaviours
--	--

(a) Evaluate the derivative of $f(g(x))$ at $x=-2$. (2 marks)

Working time: 100 minutes.

- Continuing an answer: if you need to use the space for planning, indicate this clearly at the top of the page.
 - Planning: if you use the spare pages for planning, indicate this clearly at the top of the page.
 - Answer space: if you need to use the space for continuing, give the page number. Fill in the original question that you are continuing to answer at the top of the page.
- Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.

This section has **ten** questions. Answer **all** questions. Write your answers in the spaces provided.

Section Two: Calculator-assumed (100 Marks)

Additional working space _____
Question number: _____

- (c) Evaluate the derivative of $\frac{g'(x)}{f(x)}$ at $x=0$. (3 marks)

Solution

$$\frac{d}{dx} \left(\frac{g'(x)}{f(x)} \right)_{x=0} = \frac{g''(0)f(0) - g'(0)f'(0)}{(f(0))^2} \frac{[0][3] - (-2)[1]}{3^2} \frac{2}{9}$$

Specific behaviours

ü Indicates correct application of quotient rule

ü Indicates correct value of $g''(0)$

ü Correctly evaluates derivative

P gives coordinates for both points

P calculates gradient at both points (-1 and 1) to justify equally as steep (accept third derivative test with correct conclusion)

Additional working space

Question number: _____

(1)

- a) Interpret the value of $P(0)$ in this context.
 $P(x) = -x^3 + 115x^2 - 50x - 5500$
 The profit function, $P(x)$ in \$, of a company producing x items, is given by:

(15 marks)

- b) Use Calculus methods to determine the maximum profit.
 (4 marks)

$$\begin{aligned} P'(x) &= -6x^2 + 230 \\ P''(x) &= -12x \end{aligned}$$

$$\begin{aligned} P''(0.218) &= 228.692 (+ve) \text{ so, this is a MINIMUM} \\ P''(76.449) &= -228.694 (-ve) \text{ so, this is a MAXIMUM} \end{aligned}$$

$$\therefore P(76.449) = -(76.449)^3 + 115(76.449)^2 - 50(76.449) - 5500 = 215986.93$$

- c) Find the marginal profit when $x = 50$ and explain what this value predicts.
 (3 marks)

- u Substitutes $x = 50$ into the correct equation for marginal profit
 u Determines the result indicates the profit of making one more item
 u Explains the result indicates the profit of making one more item
 u Substitutes $x = 50$ into the correct derivative for marginal profit
 u Substitutes $x = 50$, then $P'(50) = -(50^3 + 230(50) - 50) = 3950$
 The profit made on the 51st item produced was \$3950.

Solution**Specific Behaviours**

- u Substitutes $x = 50$ into the correct derivative to determine the profit of making one more item

$$P'(x) = -3x^2 + 230x - 50$$

$$\text{if } x = 50, \text{ then } P'(50) = -(50^3 + 230(50) - 50) = 3950$$

Solution**Specific Behaviours**

- u Substitutes $x = 50$ into the correct derivative to determine the profit of making one more item

$$P'(50)$$

$$= -(50^3 + 230(50) - 50) = 3950$$

$$= -3(125000 + 11500 - 50) = 3950$$

$$= -3(136500) = 3950$$

$$= -395000 + 9850 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -394020 + 3950 = 3950$$

$$= -$$

d) State the maximum marginal profit and when this occurs.

(3 marks)

Solution

$$P''(x) = -6x + 230 = 0$$

$$x = \frac{115}{3} \approx 38$$

$$P'(38) = -3(38)^2 + 230(38) - 50 = 4358$$

Thus the maximum marginal profit is \$4358 when the 38th item is produced

Specific Behaviours

ü Equates the correct equation to zero and solves for x

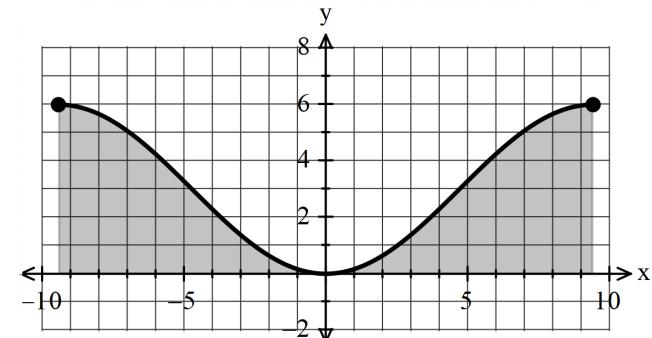

ü Determines the marginal profit

ü Explains when it occurs (explain the value of x)

Question 16

(8 marks)

A sculpture has a cross-section shown below (indicated by the shaded region). All measurements are in metres. The equation of the curve is $y = 3 - 3\cos\left(\frac{x}{3}\right)$ for $x \in [-3\pi, 3\pi]$.

- (a) Determine the height of the sculpture
mark)

(1

Solution

$$-3\pi \leq x \leq 3\pi, x = 0, -3\pi, 3\pi$$

$$x = 0, y = 0$$

$$x = \pm 3\pi, y = 6$$

Hence the maximum value of height is 6 m

Solution	
(e) How many items must be produced to ensure a profit?	(2 marks)
$-x^3 + 115x^2 - 50x - 5500 = 0$ <p>CAS Solve: $x = -6.5$, $x = 7.4$ and $x = 114.14$ Between $x = 8$ and $x = 114$ items, inclusive, is needed to ensure a profit is made. Reject $x = -6.5$.</p>	(3 marks)
Specific behaviours	

Solution	
$\frac{d}{dt} \left(\frac{7t^2 - 56t + 84}{2} \right)$ <p>7.1-28</p>	(2 marks)
<p>u relates acceleration to first derivative of velocity wrt t u determines acceleration function</p>	(d) How far has the particle travelled before its acceleration is zero?

Solution	
$\int_0^t \left \frac{7t^2 - 56t + 84}{2} \right dt$ <p>56</p>	(3 marks)
<p>solve $7t^2 - 56t + 84 = 0$, t $\{t=4\}$</p>	(e) How far has the particle travelled before its acceleration is zero?

Specific behaviours	
<p>u shows integration expression for distance travelled u determines acceleration to 0 and determines t</p>	(f) How far has the particle travelled before its acceleration is zero?

f) Determine the average profit when $x=50$.

(2 marks)

Solution

$$\text{Average profit} = \frac{P(x)}{x}$$

$$\frac{P(x)}{x} = -x^2 + 115x - 50 - \frac{5500}{x}$$

$$-(50)^2 + 115(50) - 50 - \frac{5500}{50} = 3090$$

The average profit when $x=50$ is \$3090

Specific Behaviours

ü Divides $P(x)$ by x to obtain the average profit function

ü Solves for the average profit when $x=50$

Question 15

(10 marks)

The displacement in metres, $x(t)$, of a particle t seconds after it was launched is given by:

$$x(t) = \frac{7t(t^2 - 12t + 36)}{6}, t \geq 0.$$

(a) Determine the velocity function, $v(t)$, for the particle.

(2 marks)

Solution

$$v(t) = x'(t) = \frac{7t^2 - 56t + 84}{2}$$

Specific behaviours

ü relates velocity to first derivative of displacement wrt t

ü determines the first derivative

(b) Determine the displacement of the particle at the instant it is stationary.

(3 marks)

Solution

$$\text{solve}\left(\frac{7t^2 - 56t + 84}{2} = 0, t\right)$$

$$\{t=2, t=6\}$$

$$\frac{7t \times (t^2 - 12t + 36)}{6} \mid_{t=2}$$

$$\frac{112}{3}$$

$$\frac{7t \times (t^2 - 12t + 36)}{6} \mid_{t=6}$$

$$0$$

Specific behaviours

ü solves $v=0$ for two values

ü determines displacement for one value

ü both values

(marks)

iii. What is the probability that the system fails?

(2 marks)

u Calculates the probability

Specific Behaviours

u Shows the correct numerator

Specific Behaviours $P(X \geq 4) = 0.000176$

The system will fail if 4 or more lights fail (as the system continues to work if at least three lights are working). Thus, the probability that the system fails is:

(2

c) One night, Dezz removes two of the lights so that they can be repaired. The lights are not replaced for the next night. What is the probability that the system works for that night?

(marks)

Solution

u Calculates the probability

u States the distribution of the new random variable with correct parameters

Specific Behaviours

Thus the probability that the system works for that night is 0.9801.

$$\text{Let } Y \sim \text{Bin}(4, 0.06)$$

$$P(Y \geq 2) = 0.01991088 \text{ (this is the probability that the system fails)}$$

$$1 - 0.01991088 = 0.9801$$

For the system to continue working, at most two lights can fail.

(marks)

Solution

u Calculates the probability

u States the distribution of the new random variable with correct parameters

Specific Behaviours

Thus the probability that the system works for that night is 0.9801.

(marks)

(2

c) One night, Dezz removes two of the lights so that they can be repaired. The lights are not replaced for the next night. What is the probability that the system works for that night?

Question 9

(8 marks)

Ryan and Oliver play a game where two normal six-sided dice are rolled, the uppermost number noted and then a third six-sided die is rolled. To win the game the number rolled on the third die must fall between the numbers rolled on the first two dice. For example, if a 2 and a 5 are rolled on the first two dice, to win the game a 3 or a 4 must be rolled on the third die.

- a) Determine the probability that a player has no chance of winning before even rolling the third die.

Solution

If the first two dice are rolled, and their numbers are noted, the table below shows the number of values that sit between the noted numbers from each die:

	1	2	3	4	5	6
1	0	0	1	2	3	4
2	0	0	0	1	2	3
3	1	0	0	0	1	2
4	2	1	0	0	0	1
5	3	2	1	0	0	0
6	4	3	2	1	0	0

The probability that a player has no chance of winning before the third die is rolled is $\frac{16}{36}$

Specific Behaviours

ü Ü Shows the sample space for the first two dice rolled (-1 for each error)

ü Ü Determines the probability

(HINT: Showing the sample space is helpful)

(3 marks)

(8 marks)

Question 14

(12 marks)

Dezz installs n outdoor security lights that are connected to a system which has been configured so that all the lights will turn on if their sensors detect motion. The system will continue to work if at least three of the lights are working. There is a 6% chance that any light fails. If the random variable X is the number of lights that fail,

- a) State the distribution of X , including its parameters, and state two assumptions that were required to use this distribution.
(4 marks)

Solution

$$X \sim \text{Bin}(n, 0.06)$$

We can assume a binomial distribution if:

- The probability of any light failing is independent.
- The probability of a light failing is constant for successive trials of the same experiment.

Specific Behaviours

ü Ü States a binomial distribution

ü Ü States the parameters of the distribution

ü Ü Gives one appropriate reason for the use of the distribution

ü Ü Gives two appropriate reasons for the use of the distribution

- b) If the variance of X is 0.3384,

- i. Determine the number of lights that have been used.

(2 marks)

Solution

$$\begin{aligned} \text{Var}(X) &= np(1-p) \\ 0.3384 &= 0.06n(1-0.06) \\ \therefore n &= 6 \end{aligned}$$

Specific Behaviours

ü Ü Substitutes values into the formula for variance

ü Ü Determines the correct value of n

- ii. What is the probability that less than half the lights fail given more than 1 light failed?
(2 marks)

Solution

$$P(X < 3 \vee X > 1) = \frac{P(X=2)}{P(X>1)} = \frac{0.04216}{0.04592} = 0.91803$$

(1 mark)

- b) Hence predict the population of Clipalmenton at the beginning of 2030.

Solution	
	Note: Accept $k = 0.0148$
	Shows the correct model for P from the year 2022
	Solves for the value of k
	Finds the population for 2022
	The model for P is $P = 11600e^{0.01482t}$
	$\therefore k = 0.01482$
	$10000 = 11600e^{-10k}$
	$P = P_0 e^{-kt}$
	The model for P is $P = 11600e^{0.01482t}$
	Specific Behaviours
	Set up an appropriate integral to calculate the area
	Determines the correct area (Must be exact)

- a) Assuming the growth rate of the population P remains the same in the future, use this information to write an equation to predict the population of Clipalmenton t years from the beginning of 2022.
- The population of the town 10 years ago was 10 000, and there are now (at the beginning of 2022) an extra 1600 people living in the town.
- i.e. $\frac{dp}{dt} = kp$ where P is the population at t years
- $\int dp = kp dt$
- The mining town of Clipalmenton has been experiencing population exponential growth over the last decade.
- (8 marks)

Question 10

Solution	
	Multiples each score by its probability
	Multiplies by $\frac{1}{36}$
	Determines the probability
	Specific Behaviours
	Shows the calculation for the underestimation
	Shows the correct overestimation
	Determines the correct underestimation
	Determines the average of the two estimations
	Use integration to evaluate the exact area estimated in (i).

- c) Determine the probability that a player wins the game. (3 marks)

Solution	
	Correct probabilities ($\frac{1}{36}$ for each error)
	Probability distribution table below.

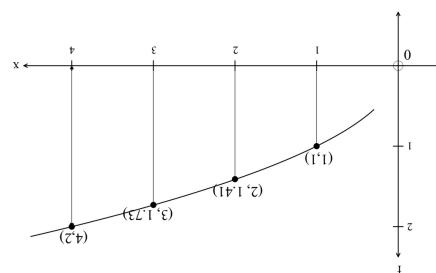

- b) Let the random variable, X , be the number of numbers between the first two dice. Complete the probability distribution table below. (2 marks)

Solution	
	Specific Behaviours
	Sets up an appropriate integral to calculate the area
	Determines the correct area (Must be exact)
	? 4.6 units^2
	$\frac{3}{2(4)^{1/2}} - \frac{3}{2(1)^{1/2}}$
	$\text{Area} = \int_{\frac{1}{2}}^1 x dx = \left[\frac{2x^{1/2}}{1} \right]_{\frac{1}{2}}^1$

- (ii) Use integration to evaluate the exact area estimated in (i). (2 marks)

Solution	
	Specific Behaviours
	Shows the calculation for the underestimation
	Shows the correct overestimation
	Determines the correct underestimation
	Determines the average of the two estimations
	The average of the two estimates is 4.64 units^2
	From below:
	$1 \times 1 + 1 \times 1.41 + 1 \times 1.73 = 4.14$
	From above:
	$1 \times 1.41 + 1 \times 1.73 + 1 \times 2 = 5.14$

- (i) Using rectangles from above and from below, find an estimate for the area between the function $y = \sqrt{x}$, $x = 1$, $x = 4$ and the x axis. Use $\Delta x = 1$ as the width of the interval. (5 marks)

Solution

$$P = 11600 e^{0.014842(8)} \\ P = 13062.44 \approx 13062 \text{ people}$$

Specific Behaviours

ü Solves for the number of people at the beginning of 2030

Note: Accept 13063 people and 13058 people (followed through $k=0.0148$)

- c) The nearby town of Scomotown has also been growing, but its population growth has been such that the equation to predict its population F in t years' time (from the beginning of 2022) is:

$$F(t) = 35000 - 25000 e^{-0.015t}$$

- i) What is the current population of Scomotown (at the beginning of 2022)? (1 mark)

Solution

$$F(0) = 35000 - 25000 e^{-0.015 \cdot 0} \\ F(0) = 35000 - 25000 = 10000 \\ \therefore \text{The current population is } 10000$$

Specific Behaviours

ü Substitutes $t=0$ and solves for the current population

- ii) During which years will the population of Scomotown be greater than the population of Clipalmerton? (3 marks)

Solution

$$35000 - 25000 e^{-0.015t} > 11600 e^{0.014842t} \\ \text{CAS Solve: } t = 9.74, t = 42.71$$

✓ Equates $A'(x)$ to zero and solves for x

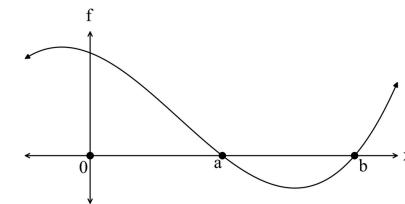

✓ Uses the sign test or second derivative test to justify x is a minimum

✓ Clearly states the value of x and the minimum surface area

Question 13

(11 marks)

Consider the graph below

- a) Given $\int_0^a f(x) dx = 5.4$ and $\int_0^b f(x) dx = 3.9$

- (i) Evaluate $\int_a^b f(x) dx$. (2 marks)

Solution

$$\int_a^b f(x) dx = \int_0^b f(x) dx - \int_0^a f(x) dx \\ \int_a^b f(x) dx = 3.9 - 5.4 = -1.5$$

Specific Behaviours

✓ Uses linearity to evaluate the integral

✓ Correctly evaluates the integral

- (ii) Determine the area bounded by the function, the x -axis and y -axis on the interval $[0, b]$. (2 marks)

Solution

$$\text{Area} = \int_0^a f(x) dx + \left| \int_a^b f(x) dx \right| = 5.4 + 1.5 = 6.9 \text{ units}^2$$

Specific Behaviours

✓ Recognises that the region from a to b needs to be positive

✓ Determines the correct area

The function $f(x) = \sqrt{x}$ is graphed below.
b)

	<p>Given the variance of a Bernoulli distribution is 0.2176, determine the mean.</p> <p>(2 marks)</p>	Section 11
	<p>Solution</p> <p>$p(1-p) = 0.2176 \Rightarrow p = 0.32, 0.68 \Leftrightarrow \text{mean is either } 0.32 \text{ or } 0.68$</p>	
	<p>Specific Behaviours</p> <p>↳ Sets up the equation for variance</p>	
	<p>↳ Solves for both values of p are possible means</p>	
	<p>↳ Solves for 1 value of t</p>	
	<p>Note: Accept beginning in 2031 and/or ending in 2064</p>	
	<p>↳ Solves for both t values</p>	
	<p>↳ Solves for 1 value of t</p>	
	<p>Clipalmeton</p>	
	<p>Scotomotion will have a greater population than Clipalmeton</p>	
	<p>Scotomotion will occur between the years 2032 to 2065</p>	
	<p>Clipalmeton. Thus this occurs between the years 2031 to 2064</p>	
	<p>∴ 9.74 < $t < 42.71$ where the population of Scotomotion will be greater than the population of</p>	

- (b) The probability of success of a Bernoulli trial is p . Given that it is repeated n times, the expected value and variance of the resulting distribution of the number of successes are 7.52 and 3.9856

Solution
$X \text{ Bin}(n, p)$
$np = 7.52$
$np(1-p) = 3.9856$
$1-p = 0.53$
$p = 0.47$
$n = 16$
Specific Behaviours
ü Identifies distribution of successes as binomial
ü States equation for mean
ü States equation for variance
ü Solves equations for n and p

- (c) The probability of Jeremy being late to his Maths class is 0.3, and the probability that he is late to his Maths class on any day is independent of whether he was late on the previous day.

Over five consecutive weekdays, what is the probability that Jeremy

- (i) is only late to his Maths class on Tuesday? (1 mark)

Solution
$0.3 \times 0.7^4 = 0.07203$
Specific behaviours

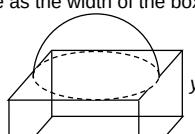

✓ correct probability

- (ii) is late on Tuesday and on at least two other days? (3 marks)

Solution
$X \text{ Bin}(4, 0.3)$
binomialCDF(2, 4, 4, 0.3)
0.3483
$P = 0.3 \times 0.3483 = 0.10449$
Specific behaviours
✓ identifies binomial situation for other two days
✓ evaluates probability of being late on two other days
✓ determines probability
Note: Max 1 mark f.t. for binomial CDf(2, 5, 5, 0.3)=0.16308

Question 12 (10 marks)

A square based prism as shown in the diagram has a hemisphere added to its top in such a way that the diameter of the hemisphere is the same as the width of the box. The volume (V) of the object is 800 cm^3 .

- (a) Determine V in terms of x and y . (1 mark)

Solution
$V = x^2 y + \frac{2\pi(\frac{x}{2})^3}{3}$
$V = x^2 y + \frac{\pi x^3}{12}$

Specific Behaviours

- ✓ Correct answer

- (b) Show that the value of y is given by $y = \frac{800}{x^2} - \frac{\pi x}{12}$ (2 marks)

Solution
$800 = x^2 y + \frac{\pi x^3}{12}$
$800 = x^2(y + \frac{\pi x}{12})$
$y = \frac{800}{x^2} - \frac{\pi x}{12}$

Specific Behaviours

- ✓ Substitutes the volume as 800
✓ Shows rearranging and simplifies to get y

- (c) Show that the surface area of the shape, $A(x)$, is given by $A(x) = 2x^2 - \frac{\pi x^2}{12} + \frac{3200}{x}$ (3 marks)

Solution
$A(x) = 2x^2 + 4xy + 2\pi(\frac{x}{2})^2 - \pi(\frac{x}{2})^2 = 2x^2 + 4xy + \frac{\pi x^2}{4}$
$A(x) = 2x^2 + 4x(\frac{800}{x^2} - \frac{\pi x}{12}) + \frac{\pi x^2}{4}$
$A(x) = 2x^2 + (\frac{\pi}{4} - \frac{\pi}{3})x^2 + \frac{3200}{x}$
$A(x) = 2x^2 - \frac{\pi x^2}{12} + \frac{3200}{x}$

Specific Behaviours

- ✓ Correct formula for surface area in terms of x and y
