

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

Special items: drawing instruments, templates, notes on _____ unfolded sheets of A4 paper, and up to three calculators approved for use in the WACE examinations

1) To Be Provided By the Candidate: Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

To be provided by the supervisor: This Questionnaire/Answer Booklet
Materials required to fill in this section

Semester 1 (Unit 1) Examination, 201

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	7	7	50	60	35
Section Two: Calculator-assumed	11	11	90	90	65
					100

Instructions to candidates

1. The rules for the conduct of School exams are detailed in the *School/College assessment policy*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer Booklet.
3. You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
4. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.
5. **Show all working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you **do not use pencil**, except in diagrams.
7. The Formula Sheet is **not** to be handed in with your Question/Answer Booklet.

(d) of the line which is the reflection of the line $2y - 3x - 4 = 0$ in the y -axis (2 marks)

(c) of the line passing through the point $(5, -4)$ and perpendicular to $y = \frac{3}{5}x - 1$ (3 marks)

(b) of the line passing through the point $(2, 3)$ and parallel to $3x + 2y + 7 = 0$ (2 marks)

(a) of the line passing through the points $(3, -3)$ and $(4, -1)$ (2 marks)

Determine the equation (9 marks)

Suggested working time: 90 minutes.

This section has (eleven) 11 questions. Answer all questions. Write your answers in the spaces provided. Spare pages are included at the end of this booklet.

Question number: _____

Question 9

(8 marks)

A researcher gathered the necessary information and developed a simulation to represent the number of attempts that people make to find the correct way through a particular maze associated with a digital game.

The graph of the result of 100 simulations is recorded below.

A : represents the event that a randomly selected person takes 5 attempts to navigate the maze successfully.

B : represents the event that a randomly selected person takes less than 5 attempts to navigate the maze successfully.

(a) Determine:

$$P(A)$$

(i)

(1 mark)

$$P(B)$$

(ii)

(2 marks)

$$P(A \cup B)$$

(iii)

(1 mark)

Question 18

(7 marks)

- (a) Given $\sin(A+B) = \sin A \cos B + \cos A \sin B$, show how to deduce the formula for $\sin(A-B)$ by letting $C = -B$ (2 marks)

- (b) Consider a rope fixed at B and tightly wrap around a disc A as shown in the diagram below.

Disc A has a radius of 10cm. If the distance of B from the nearest edge of disc A is twice the radius of disc A, determine the length of the rope. (5 marks)

- (e) If a second coin is tossed, it lands on the same colour as the first. (4 marks)

- (b) Make a statement, with supporting argument, about whether events A and B are independent, mutually exclusive or neither. (2 marks)

- (c) Given $P(B)=0$, determine the probability that a person takes 5 attempts. (2 marks)

Question 17

(12 marks)

For a particular game of chance, a coin is tossed randomly onto a board. The board has coloured regions according to the diagram below.

Lines that look like they intersect at the middle of a line segment, actually do so.

Determine the probability that

- (a) The coin lands on Blue (2 marks)

- (b) The coin lands on Blue or Orange (2 marks)

- (c) The coin is a head and lands on Green (2 marks)

- (d) The coin is tail up, given that it lands on Blue or Pink (2 marks)

(2 marks)

(c) Calculate the length of the line from A to the mid-point of BC.

(2 marks)

(b) Calculate the area of triangle ABC.

(2 marks)

(a) Calculate the length of BC.

(6 marks)

In the diagram $AB = 19 \text{ cm}$, $\angle CAB = 21^\circ$ and the exterior angle at B is 27° .

Question 10

Question 16

(8 marks)

(a) Consider the function $p(x) = x^3 - 9x^2 + 24x - 14$

(1 mark)

(ii) For what values of k will the equation $p(x) = k$ have two distinct values of x ?(b) If $2(ax + b)(x^2 - x + c) = 4x^3 - 2x^2 - 26x + 2d$, determine the values of a , b , c and d , and hence factorise the cubic expression fully. (5 marks)

(2 marks)

(c) If $2(ax + b)(x^2 - x + c) = 4x^3 - 2x^2 - 26x + 2d$, determine the values of a , b , c and d ,

Question 11

(5 marks)

The Wombat cricket club selects 11 of its 25 members at random to form a team to play in a charity match against a rival club.

- (a) How many different teams are possible? (2 marks)

- (b) In how many ways can the team be selected if the two best players are not included? (1 mark)

- (c) Determine the probability that the two best players are not selected. (2 marks)

Question 15

(6 marks)

The cross-section of a wooden hand rail is formed by the intersection of two quadratic functions

$$y = \frac{-2x^2}{27} + \frac{8x}{3} - 9$$

shown below. The upper curve is modelled by the equation $y = ax^2$. The equation of the lower curve is a quadratic of the form $x = 9$. The two curves meet at

- (a) Determine the coordinates of the point where the two curves meet. (2 marks)

- (b) Determine a and hence state the equation of the lower curve (2 marks)

- (c) If the hand rail was moved up 3 cm, determine the new equations of the upper and lower curves. (2 marks)

Question 14

Question 12

Question 9

The distance x cm of the weight above the equilibrium position is given by:
A weight on the end of a spring oscillates up and down.

$$x = 5\cos\left(\pi t - \frac{\pi}{2}\right), \text{ where } t \text{ is the time in seconds.}$$

(a) What is the position of the weight at time $t = 0$? (1 mark)

(c) What do negative values of x represent? (1 mark)

(d) On the axes provided below, draw a graph of $x = 5\cos\left(\pi t - \frac{\pi}{2}\right)$ for $0 \leq t \leq 5$, seconds (3 marks)

(a) State the equation of the circle (2 marks)

(b) State the equation of the parabola in the form $y = a(x - b)^2 + c$ (5 marks)

(c) Show, algebraically, using the discriminant, that the x -intercepts of the parabola will be irrational. (2 marks)

- (e) On your graph (drawn in part (d)), indicate those points that correspond to the weight being more than 2cm from the rest position. (2 marks)

- (f) Determine for what fraction of the time the weight is more than 2 cm from the rest position. (3 marks)

Question 13

(8 marks)

- (a) For a given set of numbers $K = \{0, 1, 2, \dots, 10\}$, the set of points Q is defined as follows:

$$Q = \{(a, b) : a \in K, b = \text{number of primes that do not exceed } a\}$$

e.g. $Q = \{(0, 0), (1, 0), (2, 1), (3, 2), (4, 2), \dots, (10, 4)\}$

- (i) State the Domain of Q (1 mark)

- (ii) State the Range of Q . (2 marks)

- (b) If the set is redefined as follows:
For $K = \{0, 1, 2, \dots, 10\}$, $Q' = \{(b, a) : a \in K, b = \text{number of primes that do not exceed } a\}$

- (i) List the elements of Q' (2 marks)

- (ii) State the Range of Q' . (1 marks)

- (c) Comment on whether either of Q or Q' would qualify to be called a function? Justify your comment. (2 marks)
