Section Two: Calculator-assumed	12	12	100	80	67
Total			120	100	

Question number: _____

Instructions to candidates

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2011*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in the spaces provided in this Question/Answer Booklet. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are continuing to answer at the top of the page.
3. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
4. It is recommended that you **do not use pencil**, except in diagrams.

Question 8**(40 Marks)**

This section has **eight (8)** questions. Answer all questions. Write your answers in the spaces provided.

Working time for this section is **50 minutes**.

Question 1

Find the minimum and maximum values of $f(x) = 2x^3 - 3x^2 - 12x + 27$ over the interval $-3 \leq x \leq 3$.

- m can be any odd integer.

- m can be any even integer.

(a) Use counter-examples to disprove any two of the three conjectures listed below. (2 marks)

The variables k and m are both integers such that $m^2 + 3 = 2k$.

Question 1

Find the minimum and maximum values of $f(x) = 2x^3 - 3x^2 - 12x + 27$ over the interval $-3 \leq x \leq 3$.

- m must be a positive odd integer.

(b) Using the fact that any odd integer can be written in the form $2n + 1$ or otherwise, prove that k is always the sum of three square numbers. (4 marks)

Question 2

Find $\frac{dy}{dx}$ in terms of x for each of the following.

(a) $y = x(1 + 2e^{3x})$

(5 marks)

(2 marks)

(b) $y = \int_1^x t^2 + t - 1 \, dt$

(1 mark)

(c) $y = z^3 - z$ and $z = x^2 - 9$

(2 marks)

Question 7

(4 marks)

The region in the first quadrant bounded by $x = 0$, $y = 0$ and $y = 1 - \frac{x^2}{9}$ is rotated 360° about the y -axis. If x and y are distances measured in centimetres, find the volume of the solid formed.

MATHEMATICS 3C/3D	8	CALCULATOR-FREE
Question 6	5 marks	Two independent events A and B are such that $P(A) = 0.9$ and $P(B) = 0.4$.
(a)	1 mark	Determine $\int 2e^{-0.2y} dy$.
(a)	5 marks	Find $P(\underline{A} \cup \underline{B})$.
(b)	2 marks	Determine $\int (t - 1)(1 - 2t + t^2)^3 dt$.

(b)	1 mark	Find $P(\underline{A} \cup \underline{B})$.
(b)	2 marks	Determine $\int (t - 1)(1 - 2t + t^2)^3 dt$.
(c)	2 marks	Show that \underline{A} and \underline{B} are also independent.
(c)	2 marks	Evaluate $\int_0^6 3\sqrt{x^2} dx$.

(c)	2 marks	Show that \underline{A} and \underline{B} are also independent.
(c)	2 marks	Evaluate $\int_0^6 3\sqrt{x^2} dx$.

Question 4

Two functions are defined as $f(x) = \sqrt{x - 1}$ and $g(x) = \frac{1}{x - 1}$.

- (a) Evaluate $g \circ f\left(\frac{13}{9}\right)$.

(7 marks)

(2 marks)

- (b) Find in simplified form $g \circ g(x)$.

(2 marks)

- (c) Determine the domain of $f(g(x))$.

(3 marks)

Question 5

$$c + 2a = 3 + 4b$$

$$a + 2b + 2c = 4$$

$$5a + 3c = 5 + 2b$$

Solve the system of equations

(4 marks)
