

Perth Modern School
Semester 1 Examination 2014
Question/Answer Booklet

Important note to candidates

No other items may be used in this section of the examination. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised notes or other items set by the supervisor before reading any further.

Materials required/recommended for this section

Working time for this section: one hundred minutes
Reading time before commencing work: ten minutes
Name of Teacher: _____
Name of Student: _____

MATHEMATICS 3CD
Section Two:
Calculator-assumed

To be provided by the supervisor
Formula Sheet (retained from Section One)
This Question/Answer Booklet
Standard items: pens, pencils, pencil sharpener, eraser, correction fluid/tape, ruler, highlighters
Special items: drawing instruments, templates, notes on two unfolded sheets of A4 paper,
and up to three calculators satisfying the conditions set by the Curriculum Council for this examination.

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	7	7	50	50	33½%
Section Two: Calculator-assumed	12	12	100	100	66%
		Total		150	100

Additional working space

Question number: _____

Instructions to candidates

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2013*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in the spaces provided in this Question/Answer Booklet. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are continuing to answer at the top of the page.
3. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
4. It is recommended that you **do not use pencil**, except in diagrams.

Question 9 (11 marks)

The mass of a drug remaining in the bloodstream of a patient is changing according to the rule
 $\frac{dM}{dt} = -0.12M$, where M is the mass of drug remaining t hours after the initial dose of 60 milligrams was administered.

- (a) Describe the type of relationship between M and t . (1 mark)

- (b) Write down an equation for M in terms of t . (1 mark)

- (c) Determine the mass of drug remaining in the bloodstream after one day. (1 mark)

- (d) Sketch the graph of M against t on the axes below. (3 marks)

Additional working space

Question number: _____

- Question 19**
- (a) Find the volume of the solid formed when the area of the region enclosed by the curve $y = x^2$, the x axis and the line $x = 4$ is rotated through one revolution about the x axis. (2 marks)
- (b) Matthew, who is 1.8m tall, is walking away from a spotlight which is situated on top of a pole 5.4m high. If he is walking quickly at a rate 2.1 m/s, find how fast Matthew's shadow is changing on the ground. (4 marks)
- (c) Give your answer to three significant figures and show the units of change. (3 marks)
- (d) At what rate is the mass of the drug in the bloodstream changing after 12 hours? (3 marks)
- (e) Determine, to the nearest hour, the time taken for less than one percent of the initial dose to remain in the bloodstream of the patient. (2 marks)
- (f) Calculate-Assumed

Question 10 (10 marks)

A transport company uses the same type of tyre for all 35 of its trailers. The number of kilometres that a new tyre lasts is normally distributed with a mean of 85 000 km and a standard deviation of 9 500 km.

- (a) What percentage of all tyres bought will last more than 100 000 km? (2 marks)

- (b) Two tyres are chosen at random. What is the probability that neither tyre will last for more than 100 000 km? (2 marks)

- (c) Determine the distance that will be exceeded by 99% of all tyres. (2 marks)

- (d) Given that a tyre has already travelled 90 000 km, what is the probability that it will not last another 5 000 km? (2 marks)

- (e) A trailer is fitted with 12 randomly chosen new tyres. Calculate the probability that at least two of these tyres will last more than 100 000 km. (2 marks)

Question 18 (7 marks)

After a storm had passed, a yachtsman noticed that the labels had washed off 18 identical cans of food stored below deck. The yachtsman knows that six of the cans contain lamb stew and the remainder contain beef stew. The yachtsman selects four of the cans at random.

- (a) What is the probability that all four cans selected contain beef stew? (2 marks)

- (b) What is the probability that no more than two cans selected contain lamb stew? (3 marks)

- (c) The yachtsman opens two of the four cans selected and finds that they both contain beef stew. What is the probability that all four selected contain beef stew? (2 marks)

A farmer is growing watermelons and on a certain day it is estimated that, if harvested, the total weight of the watermelon crop would be 270 kg. At the same time, the price of watermelon was 88 cents per kg at the local market. For every day that the harvest is delayed, the total weight of the crop is expected to increase by 9 kg, whilst the price is expected to drop by 2 cents per kg.

Let x be the number of days the farmer delays harvesting the watermelon crop.

(a) Show that the total value, V in dollars, of the watermelon crop is given by

$$V = \frac{9(1320 + 14x - x^2)}{50}.$$

A bus service departs from a terminus every 30 minutes throughout the day. If a passenger arrives at the terminus at a random time to catch the bus, their waiting time, W in minutes, until the next bus departs is a uniformly distributed random variable.

(a) Sketch the graph of the density function of W .

(b) What is the probability that a passenger who arrives at a random time has to wait no more than 25 minutes for the bus to depart?

to wait no more than 25 minutes for the bus to depart?

(c) What is the probability that fewer than four passengers, out of a random selection of ten,

have to wait at least 25 minutes for the bus to depart?

(d) Determine $P(W \leq 20 | W \geq 12)$.

(e) Determine the value of w for which $P(W < w) = P(W > 3w)$.

(f) Use calculus methods to determine the optimum number of days the harvest should be delayed to achieve the largest value for the farmer, and state this value.

(3 marks)

(9 marks)**Question 12**

For two events, A and B , $P(A \cap \bar{B}) = 0.3$, $P(\bar{A} \cap \bar{B}) = 0.1$ and $P(B \cap \bar{A}) = x$.

- (a) Determine an expression for $P(A \cap B)$ in terms of x . (2 marks)

- (b) State the maximum possible value of $P(A)$. (1 mark)

- (c) Determine the value of x under each of the following conditions.

- (i) A and B are mutually exclusive. (1 mark)

- (ii) $P(A | B) = \frac{1}{5}$. (2 marks)

- (iii) A is independent of B . (3 marks)

- (d) Use calculus methods to determine the dimensions of the rectangle that maximise the volume of the cylinder and state this maximum volume. (4 marks)

(2 marks)

- (iii) not have blue eyes, given they do not belong to blood group O?

(1 mark)

- (ii) have blue eyes or belong to blood group O?

(1 mark)

- (i) belong to blood group O and have blue eyes?

(3 marks)

$$(c) \text{ Show that the volume of the rolled cylinder is given by } V = \frac{4\pi}{x^2} (42 - x).$$

- (b) What is the probability that a randomly selected patient will

(4 marks)

- (a) Use this information to complete the probabilities P_1 to P_8 in the tree diagram below.

- 31.9% of patients are blue eyed and do not belong to blood group O
- 42.9% of patients belong to the blood group O (set O)
- 58% of patients are blue eyed (set B)

The clinical records of a large eye hospital indicate that

(1 mark)

(b) Explain why $x = 2\pi r$.

(1 mark)

(a) Explain why $x + y = 42$.

A rectangular sheet of paper with perimeter 84 cm is to be rolled into a cylinder. Let x and y be the dimensions of the sheet of paper, as shown below, and r the radius of the rolled cylinder. A right-angled triangle is formed by the sheet of paper and the radius r of the cylinder. The hypotenuse of the triangle is the slant height of the cylinder, which is equal to the width x of the sheet of paper. The vertical leg of the triangle is the height y of the sheet of paper, which is also the circumference of the base of the cylinder. The horizontal leg of the triangle is the radius r of the cylinder, which is half the width x of the sheet of paper. Therefore, the radius r is $\frac{x}{2}$.

Question 13

Question 16

(9 marks)

Question 14

A new teaching method to improve arithmetic skills is being investigated by a school. A group of 50 students are randomly chosen to take part in a ten week trial of the new method.

There is a 60% chance that any one of these students will show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial.

Let X denote the number of students out of 50 who will show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial.

- (a) Is the random variable X discrete or continuous? Justify your answer. (2 marks)

- (b) State the probability distribution of X . (2 marks)

- (c) Calculate the mean and standard deviation of X . (2 marks)

- (d) What is the probability that at least half of the students will show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial? (2 marks)

- (e) What is the most likely number of students in a group of 50 to show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial? (1 mark)

(7 marks)

Question 15

The graphs of $y = f(x)$ and $y = g(x)$ are shown below over their respective domains.

- (a) Determine

(i) $g(6)$

(1 mark)

(ii) $g \circ f(9)$

(1 mark)

- (b) Determine

(i) the range of $g(x)$

(1 mark)

(ii) the range of $f \circ g(x)$

(2 marks)

(iii) the domain of $g \circ f(x)$

(2 marks)
