

No other items may be used in this section of the examination. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

### Important note to candidates

Special items: drawing instruments, templates, notes on two unfolded sheets of A4 paper, Council for this examination, and up to three calculators satisfying the conditions set by the Curriculum Standard items: pens, pencils, pencil sharpener, eraser, correction fluid/tape, ruler, highlighters

To be provided by the candidate Standard items: pens, pencils, pencil sharpener, eraser, correction fluid/tape, ruler, highlighters

**Structure of this paper**

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	7	7	50	50	33½%
Section Two: Calculator-assumed	12	12	100	100	66%
		<b>Total</b>		150	100

**Additional working space**

Question number: \_\_\_\_\_

**Instructions to candidates**

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2013*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in the spaces provided in this Question/Answer Booklet. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
  - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
  - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are continuing to answer at the top of the page.
3. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
4. It is recommended that you **do not use pencil**, except in diagrams.

(3 marks)

(c) Determine the height of the projectile at the instant that its height is decreasing at 69 metres per second.

$$h(7.3) = 264.8 \text{ m}$$

$$t = 7.3, t \geq 7$$

$$3t^2 - 58t + 195 = -69$$

(2 marks)

(b) Calculate the average rate of change of height of the projectile between  $t = 1.5$  and  $t = 2$ .

$$= 102.75 \text{ m/s}$$

$$= \frac{0.5}{0.5}$$

$$= 51.375$$

$$= \frac{282 - 230.625}{2 - 1.5}$$

$$= 102.75 \text{ m/s}$$

(2 marks)

(a) Determine the instantaneous rate of change of height of the projectile when  $t = 1.5$ 

$$h(1.5) = 114.75 \text{ m/s}$$

$$h(t) = 3t^2 - 58t + 195$$

 $t$  is the elapsed time in seconds,  $0 \leq t \leq 10$ .The height,  $h$  metres, of a projectile above level ground is given by  $h(t) = t^3 - 29t^2 + 195t$ , where

Additional working space

Question number: \_\_\_\_\_

This section has twelve (12) questions. Answer all questions. Write your answers in the spaces provided.

**Question 9** (11 marks)

The mass of a drug remaining in the bloodstream of a patient is changing according to the rule  
 $\frac{dM}{dt} = -0.12M$ , where  $M$  is the mass of drug remaining  $t$  hours after the initial dose of 60 milligrams was administered.

- (a) Describe the type of relationship between  $M$  and  $t$ . (1 mark)

Exponential decay

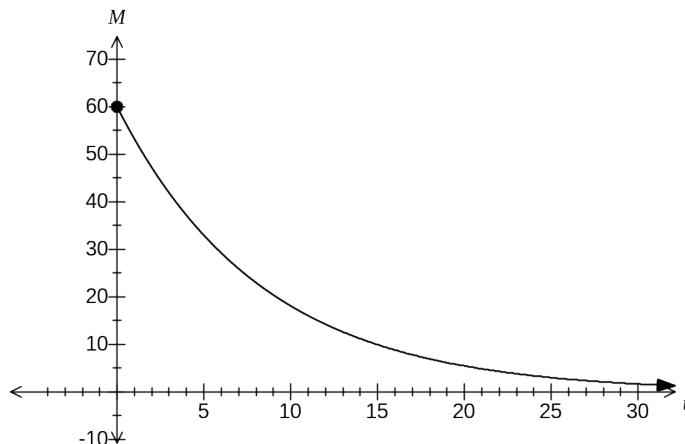

- (b) Write down an equation for  $M$  in terms of  $t$ . (1 mark)

$$M = 60e^{-0.12t}$$

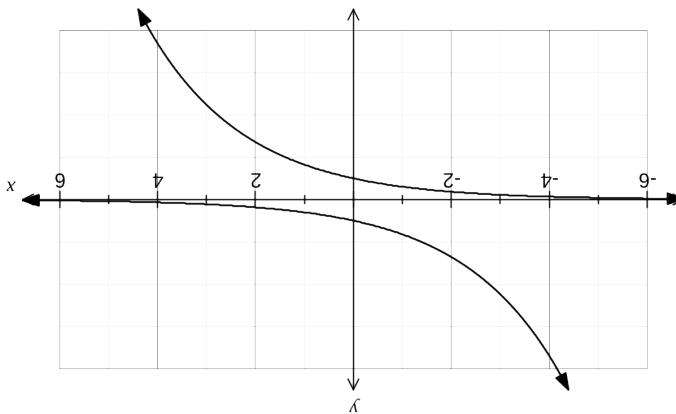

- (c) Determine the mass of drug remaining in the bloodstream after one day. (1 mark)

$$\begin{aligned} M(24) &= 60e^{-0.12 \times 24} \\ &= 3.37 \text{ mg} \end{aligned}$$

- (d) Sketch the graph of  $M$  against  $t$  on the axes below. (3 marks)

**Additional working space**

Question number: \_\_\_\_\_

(3 marks)

On the same axes, sketch the graph of  $y = -ae^{bx}$ .(c) The graph of  $y = ae^{-bx}$  is shown below, where  $a$  and  $b$  are constants.

$$\begin{aligned} M(12) &= 60e^{-0.12 \times 12} \\ &= 14.2157 \\ \frac{dM}{dt} &= -0.12 \times 14.2157 \\ &= -1.70588 \\ \text{Hence decreasing at } 1.71 \text{ mg per hour.} \end{aligned}$$

(f) Give your answer to three significant figures and show the units of change. (3 marks)

At what rate is the mass of the drug in the bloodstream changing after 12 hours?

(3 marks)

(b) Describe, in order, the transformations required to sketch the graph of  $y = e^{-3x}$  from the graph of  $y = e^x$ .

1. Translate 1 unit left (parallel to  $x$ -axis)
2. Reflect in  $y$ -axis
3. Dilate parallel to  $x$ -axis by scale factor  $\frac{1}{3}$
- (NB Order of 2 & 3 can be swapped)

$$\lim_{n \rightarrow \infty} \left[ 1 + \frac{e}{n} \right]^n$$

(1 mark)

$$\begin{aligned} 0.01 &= e^{-0.12t} \\ t &= 38.376 \\ \approx 38 \text{ hours} \end{aligned}$$

(1 mark)

(a) Simplify  $\lim_{n \rightarrow \infty} \left[ 1 + \frac{e}{n} \right]^n$ 

$$\lim_{n \rightarrow \infty} \left[ 1 + \frac{1}{n} \right]^n$$

(e) Determine, to the nearest hour, the time taken for less than one percent of the initial dose to remain in the bloodstream of the patient. (2 marks)

(8 marks)

(d) Simplify  $0.01 = e^{-0.12t}$

(10 marks)

**Question 10**

A transport company uses the same type of tyre for all 35 of its trailers. The number of kilometres that a new tyre lasts is normally distributed with a mean of 85 000 km and a standard deviation of 9 500 km.

- (a) What percentage of all tyres bought will last more than 100 000 km? (2 marks)

$$\begin{aligned} P(X > 100000) &= 0.0572 \\ &\approx 5.72\% \end{aligned}$$

- (b) Two tyres are chosen at random. What is the probability that neither tyre will last for more than 100 000 km? (2 marks)

$$\begin{aligned} (1 - 0.0572)^2 &= 0.9428^2 \\ &= 0.8889 \end{aligned}$$

- (c) Determine the distance that will be exceeded by 99% of all tyres. (2 marks)

$$\begin{aligned} P(X > k) &= 0.99 \\ k &= 62899.7 \\ &\approx 62 900 \text{ km} \end{aligned}$$

- (d) Given that a tyre has already travelled 90 000 km, what is the probability that it will not last another 5 000 km? (2 marks)

$$\begin{aligned} P(X < 95000 | X > 90000) &= \frac{P(90000 < X < 95000)}{P(X > 90000)} \\ &= \frac{0.15308}{0.29933} \\ &= 0.5114 \end{aligned}$$

- (e) A trailer is fitted with 12 randomly chosen new tyres. Calculate the probability that at least two of these tyres will last more than 100 000 km. (2 marks)

$$\begin{aligned} Y &\sim B(12, 0.0572) \\ P(Y \geq 2) &= 0.1477 \end{aligned}$$

(7 marks)

**Question 18**

After a storm had passed, a yachtsman noticed that the labels had washed off 18 identical cans of food stored below deck. The yachtsman knows that six of the cans contain lamb stew and the remainder contain beef stew. The yachtsman selects four of the cans at random.

- (a) What is the probability that all four cans selected contain beef stew? (2 marks)

$$\begin{aligned} \frac{{}^{12}C_4 {}^6C_0}{{}^{18}C_4} &= \frac{11}{68} \\ &\approx 0.1618 \end{aligned}$$

- (b) What is the probability that no more than two cans selected contain lamb stew? (3 marks)

Let  $X =$ number of lamb cans

$$\begin{aligned} P &= P(X = 0) + P(X = 1) + P(X = 2) \\ &= \frac{11}{68} + \frac{{}^{12}C_3 {}^6C_1}{{}^{18}C_4} + \frac{{}^{12}C_2 {}^6C_2}{{}^{18}C_4} \\ &= \frac{11}{68} + \frac{22}{51} + \frac{11}{34} \\ &= \frac{11}{12} \\ &\approx 0.9167 \end{aligned}$$

- (c) The yachtsman opens two of the four cans selected and finds that they both contain beef stew. What is the probability that all four selected contain beef stew? (2 marks)

$$\begin{aligned} \frac{{}^{10}C_2 {}^6C_0}{{}^{16}C_2} &= \frac{3}{8} \\ &\approx 0.375 \end{aligned}$$

**(9 marks)****Question 12**

For two events,  $A$  and  $B$ ,  $P(A \cap \bar{B}) = 0.3$ ,  $P(\bar{A} \cap \bar{B}) = 0.1$  and  $P(B \cap \bar{A}) = x$ .

- (a) Determine an expression for  $P(A \cap B)$  in terms of  $x$ . (2 marks)

$$\begin{aligned} P(A \cap B) &= 1 - 0.3 - 0.1 - x \\ &= 0.6 - x \end{aligned}$$

- (b) State the maximum possible value of  $P(A)$ . (1 mark)

$$x = 0 \Rightarrow P(A) = 0.9$$

- (c) Determine the value of  $x$  under each of the following conditions.

- (i)  $A$  and  $B$  are mutually exclusive. (1 mark)

$$P(A \cap B) = 0 \Rightarrow x = 0.6$$

- (ii)  $P(A|B) = \frac{1}{5}$ . (2 marks)

$$\begin{aligned} \frac{0.6 - x}{0.6} &\equiv \frac{1}{5} \\ 0.6 - x &= 0.12 \\ x &= 0.48 \end{aligned}$$

- (iii)  $A$  is independent of  $B$ . (3 marks)

$$\begin{aligned} (0.3 + 0.6 - x)(0.6) &= 0.6 - x \\ 0.54 - 0.6x &= 0.6 - x \\ 0.4x &= 0.06 \\ x &= \frac{3}{20} = 0.15 \end{aligned}$$

- (d) Use calculus methods to determine the dimensions of the rectangle that maximise the volume of the cylinder and state this maximum volume. (4 marks)

$$\frac{dV}{dx} = \frac{84x - 3x^2}{4\pi}$$

$$0 = \frac{84x - 3x^2}{4\pi} \Rightarrow x = 0, x = 28$$

$$y = 42 - 28 = 14$$

Dimensions are 28 by 14 cm

$$\begin{aligned} V(28) &= \frac{2744}{\pi} \\ &\approx 873 \text{ cm}^3 \end{aligned}$$

(9 marks)

**Question 14**

A new teaching method to improve arithmetic skills is being investigated by a school. A group of 50 students are randomly chosen to take part in a ten week trial of the new method.

There is a 60% chance that any one of these students will show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial.

Let  $X$  denote the number of students out of 50 who will show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial.

- (a) Is the random variable  $X$  discrete or continuous? Justify your answer. (2 marks)

Discrete.

$X$  can only be integer values between 0 and 80.

- (b) State the probability distribution of  $X$ . (2 marks)

$X$  follows a binomial distribution with parameters  $n = 50$  and  $p = 0.6$ .

- (c) Calculate the mean and standard deviation of  $X$ . (2 marks)

$$\bar{X} = 50 \times 0.6 \\ = 30$$

$$SD = \sqrt{30(1 - 0.6)} \\ = 3.464$$

- (d) What is the probability that at least half of the students will show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial? (2 marks)

$$0.5 \times 50 = 25$$

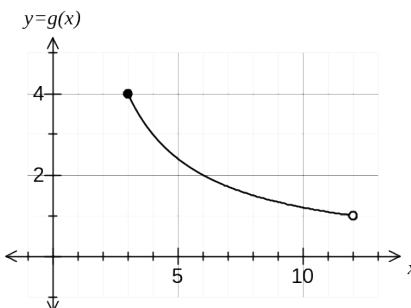

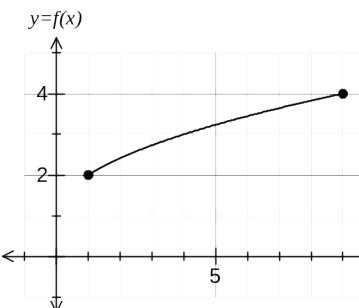

$$P(X \geq 25) = 0.9427$$

- (e) What is the most likely number of students in a group of 50 to show an improvement in arithmetic skills after ten weeks, if they do not take part in the trial? (1 mark)

Most likely number is the same as the mean - 30 students.

(7 marks)

The graphs of  $y = f(x)$  and  $y = g(x)$  are shown below over their respective domains.

- (a) Determine

(i)  $g(6)$

2

(1 mark)

(ii)  $g \circ f(9)$

$g \circ f(9) = g(4) = 3$

(1 mark)

- (b) Determine

(i) the range of  $g(x)$

$y : 1 < y \leq 4$

(1 mark)

(ii) the range of  $f \circ g(x)$

$f \circ g(3) = 3$   
 $f \circ g(12) = 2$   
 $y : 2 < y \leq 3$

(2 marks)

(iii) the domain of  $g \circ f(x)$

$f(1) = 2 \rightarrow$  not in domain of  $g$   
 $f(4) = 3 \rightarrow$  lower bound of domain of  $g$   
 $f(9) = 4 \rightarrow$  within domain of  $g$   
 $x : 4 \leq x \leq 9$

(2 marks)
