

RESOURCE-RICH

MATHEMATICS 3AMAT/3BMA SAMPLE EXAMINATION

This sample examination paper was developed early 2007 and distributed to all Mathematics teachers as part of the formal consultation process (April-May 2007). The purpose was to provide teachers with an example of how the course syllabus could be examined—specifically the scope, style and difficulty level of the questions that might be asked in a typical Mathematics 3A/3B WACE examination. The sample paper has been further refined following the consultation with teachers, measurement specialists and advice from the Assessment, Review and Moderation (ARM) panel.

The sample paper has been further refined following consultation with teachers, measurement specialists and advice from the Assessment, Review and Moderation (ARM) panel. The major change is that the paper has been divided into two parts—a resource-free examination of 50 minutes, worth 40 marks, and a resource-rich examination of 100 minutes, worth 80 marks.

DRAFT

MATHEMATICS 3AMAT/3BMAT WRITTEN PAPER RESOURCE-RICH

Please place one of your student identification labels in this box.

Time allowed for this paper
Reading time before commencing work:
Ten minutes
Working time for paper:
One hour and forty minutes

Material required/recommended for this paper
To be provided by the supervisor
This Question/Answer Booklet
What kind(s) of calculator did you bring to this examination?

To be provided by the candidate
Standard items: Pens, pencils, eraser, correction fluid, ruler,
highlighter
Special items: Curriculum Council Mathematical Formulae
and Statistical Tables Book, drawing
instruments, templates, notes on TWO unfolded sheets of A4 paper and
calculators satisfying the conditions set by the Curriculum Council for this
subject.
Note: Personal copies of the Tables Book should not contain any handwritten
or typed notes, symbols, signs, formulae or any other marks (including
underlining and highlighting) except a name and address, and may be
inspected during the examination.

This paper is for students who have completed Units 3AMAT and 3BMAT as their last pair of units.
No other items may be taken into the examination room. It is **your** responsibility to ensure that
you do not have any unauthorised notes or other items of a non-personal nature in the
examination room. If you have any unauthorised notes or other material with you, hand it to the supervisor
before reading any further.

Important note to candidates
Before reading any further.
You do not have any unauthorised notes or other items of a non-personal nature in the
examination room. If you have any unauthorised notes or other items with you, hand it to the supervisor
before reading any further.

No other items may be taken into the examination room. It is **your** responsibility to ensure that
you do not have any unauthorised notes or other items of a non-personal nature in the
examination room. If you have any unauthorised notes or other items with you, hand it to the supervisor
before reading any further.

Structure of this paper

Working time	Number of questions available	Number of questions to be attempted	Marks
1 hour 40 minutes	10	10	80
	[Total marks]		80

This paper has **TEN (10)** questions. Attempt **ALL** questions.

Question	Marks
1	8
2	7
3	7
4	7
5	7
6	6
7	8
8	15
9	8
10	7
Total marks	80

Instructions to candidates

- The rules for the conduct of Curriculum Council examinations are detailed in the *Student Information Handbook*. Sitting this examination implies that you agree to abide by these rules.
- Write your answers in the spaces provided in this Question/Answer Booklet. Spare pages may be found at the end of the booklet. If you need to use them, indicate in the original answer space where the answer is continued (i.e. give the page number).
- A blue or black ballpoint or ink pen should be used.
- It is recommended that you **do not use pencil** except in diagrams.
- Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Correct answers given without supporting reasoning may not be allocated full marks. Incorrect answers given without supporting reasoning cannot be allocated any marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked
- On the front cover you are asked to state the kinds of calculator that you brought into the examination. This information is required to ensure the examination is fair for all students. Please complete the box. Note that the same marking procedure will apply to all scripts, whatever calculator you use.

- (d) Comment on the reliability of your prediction in (b), in terms of the context.

[1 mark]

Question 10 [7 marks]

The scores in a Chemistry Examination (maximum mark 200) were normally distributed with a mean of 124 marks and a standard deviation of 30 marks.

- (a) What proportion of students scored less than 100 marks?

[2 marks]

- (b) The top 2% of students were awarded a certificate of distinction. What minimum mark was needed for a certificate of distinction?

[2 marks]

- (c) The middle 40% of students received a grade of C. What were the minimum and maximum marks in order for a student to be awarded a C?

[3 marks]

RESOURCE-RICH

This paper has **TEN (10)** questions. Attempt **ALL** questions.

MATHEMATICS 3A/3B

3

SAMPLE EXAM

SAMPLE EXAM

14

MATHEMATICS 3A/3B

[3 marks]

(c) It is chosen at random from the male group surveyed and a female is chosen at random from the female group surveyed, who is more likely to be in favour of the proposal?

[2 marks]

(iii) is a male, given the adult is against the proposal.

[1 mark]

(b) If an adult from the survey is chosen at random, he is a male in favour of the proposal.

	Total			
	Total			
	Male			
	In favour	Against	Undecided	Total
Female				
Total				

[2 marks]

(a) Display the data in the table below, then complete the table.

A sample of 200 adults was surveyed about a proposal to limit proportionality drivers to the use of four- or five-wheeled cars. Seveny of the 106 females surveyed were in favour of the proposal and five were undecided. A total of 121 adults were in favour and forty males were against the proposal.

Question 1 [8 marks]

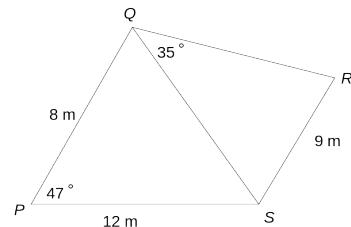

Question 9 [8 marks] Sales at a school canteen over a four-week period are given in the table below:

Week	Day	Time	Sales (\$ in dollars)	Residual mouling average
1	Monday	1	630	-
1	Tuesday	2	520	-
1	Wednesday	3	530	566
1	Thursday	4	550	568
1	Friday	5	600	568
1	Monday	6	640	574
1	Tuesday	7	520	574
1	Wednesday	8	540	578
1	Thursday	9	570	580
1	Friday	10	620	584
1	Monday	11	650	582
1	Tuesday	12	540	582
1	Wednesday	13	530	582
1	Thursday	14	570	584

SAMPLE EXAM

Question 2 [7 marks]

Use the diagram below to answer the following questions:

- (a) Determine the length of QS.

[3 marks]

- (b) Given that angle R is acute, determine the size of angle QRS.

[2 marks]

- (c) Determine the area of quadrilateral PQRS.

[2 marks]

- (c) (i) What population size will the European wasps level out at if the sterilisation program continues?

[1 mark]

- (ii) Explain mathematically why the population levels out.

[3 marks]

- (d) Sketch the population from 1995 to beyond 2007 onto the axes below, including any important values.

[4 marks]

[3 marks]

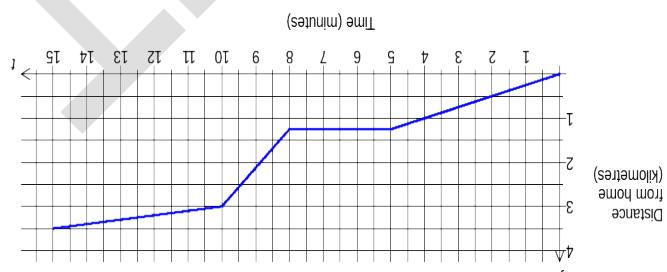

- (c) If Kim had ridden her bicycle all the way to school at school earlier, later or at the same time? Justify your answer.

[2 marks]

- (b) Determine the speed of the car in kilometres per hour.

[2 marks]

- (a) Determine Kim's bicycle riding speed in metres per second.

Question 3 [7 marks]

- Kim rode her bicycle to her friend's place. After a brief stop, her friend's father gave them both a lift in his car to a point near their school. They then walked the final distance to school. The graph below represents their journey:

At the beginning of 1995, the European wasp population in the Perth suburb of Waspville, was 400. It increased at a rate of 10% for 2 years.

A sterilisation program was introduced at the beginning of 1997 by the WA Department of Agriculture. As a result, the numbers decreased dramatically then increased before leveling out at a stable population P_t , following the model:

$$P_t = 2.5P_{t-1} - 0.005(P_{t-1})^2$$

for $t > 2$, where t is in years.

(a) Complete the table below showing the starting population for each year from 1995 to 2007.

Year	Beginning population
1995	400
1996	39
1997	P_1
1998	P_2
1999	P_3
2000	P_4
2001	P_5
2002	P_6
2003	P_7
2004	P_8
2005	P_9
2006	P_{10}
2007	P_{11}

(b) Population during 1995 and 1996 can be described by:

$$P_t = k a^t$$

(ii) Give the values of k and a .

[2 marks]

[1 mark]

(i) What type of function is this?

(Note: Two values have been completed for you.)

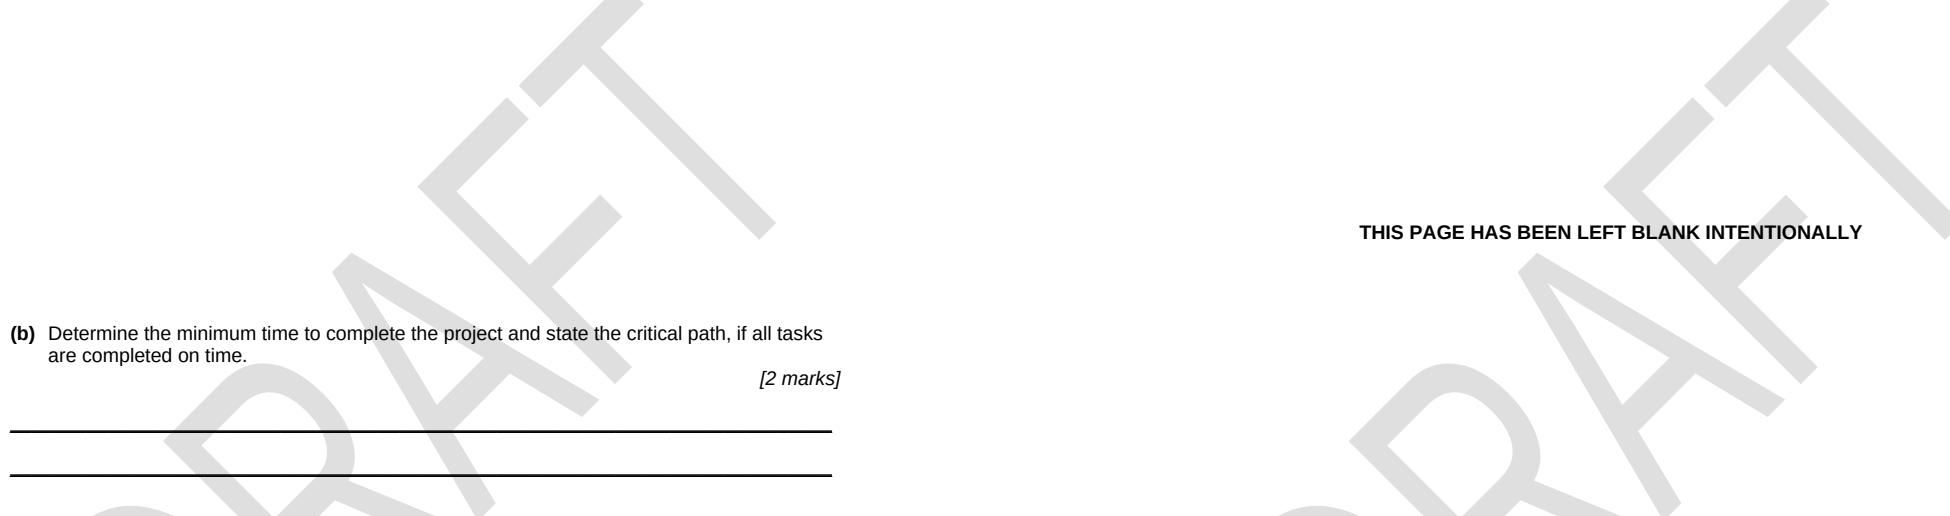

Question 4 [7 marks]

The table below shows the tasks required to complete a job:

Task	A	B	C	D	E	F	G	H	I	J
Immediate Predecessor	-	-	A	A	B	C	C	D	G,H,E	F,I
Time (days)	6	8	3	5	5	5	4	4	2	4

- (a) Draw a project network which satisfies the above conditions.

[3 marks]

- (b) Determine the minimum time to complete the project and state the critical path, if all tasks are completed on time.

[2 marks]

- (c) If Task C were delayed by 3 days, what effect, if any, would this have on the completion time?

[1 mark]

- (d) If Task D were shortened by 3 days, what effect, if any, would this have on the completion time?

[1 mark]

THIS PAGE HAS BEEN LEFT BLANK INTENTIONALLY

(a) How many students sat for the examination?

[1 mark]

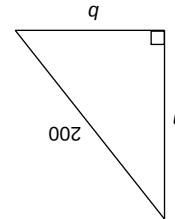

(b) Describe student performance in the examination.

[6 marks]

Score on Maths 3A	11-20	21-30	31-40	41-50	51-60	61-70	71-80	81-90	91-100	Students	Number of exam (%)
9	20	29	25	15	8	7	4	2	2	20	11
9	20	29	25	15	8	7	4	2	2	20	11
9	20	29	25	15	8	7	4	2	2	20	11
9	20	29	25	15	8	7	4	2	2	20	11

The table below shows the scores of the students at a large school in the Semester One. Mathematics 3A examination.

A farmer wishes to create a holding pen by fencing off an area in the corner of a fenced paddock with 200 metres of fencing as shown in the right triangle:

(a) Show that the height, in terms of the base, is given by the equation:

$$h = \sqrt{200 + b}(200 - b)$$

[2 marks]

(c) Determine the maximum area. Clearly show the method used.

Base, b (m)	Height, h (m)	Area, A (m^2)
90	178.61	8037.26
100		
110		

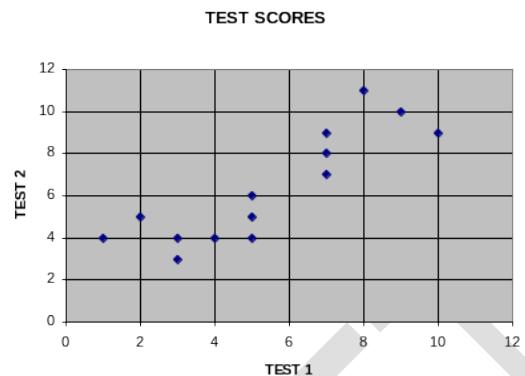

(b) Complete the following table (to two decimal places):

[2 marks]

[4 marks]

Question 6 [6 marks]

The graph below shows the results of 14 students on two tests. All marks are whole numbers.

Using all the 14 data points:

- the correlation coefficient is $r = 0.864$ (3 d.p.)
- the equation of the line of regression is $y = 0.844x + 1.775$ (3 d.p.)

When the two data points with the lowest scores on Test 1 and the two data points with highest scores on Test 1 are removed

- the correlation coefficient is $r = 0.928$ (3 d.p.)
- the equation of the line of regression is $y = 1.359x - 1.239$ (3 d.p.)

- (a) (i) Use the more appropriate of the two lines of regression to estimate the mark on Test 2 for a student who scored 4 on Test 1.

[1 mark]

- (ii) Justify why you used that particular line of regression and comment on the reliability of your prediction.

[2 marks]

- (b) (i) Use the more appropriate of the two lines of regression to estimate the mark on Test 2 for a student who scored 11 on Test 1.

[1 mark]

- (ii) Justify why you used that particular line of regression and comment on the reliability of your prediction.
