exceptional school. Exceptional students.

Semester One Examination, 2017

Semester One Examination, 2017

Your name _____

Student Number: _____ In figures _____

Time allowed for this section	Reading time before commencing work:	Working time:
Materials required/recommended for this section	five minutes	fifty minutes

To be provided by the candidate Standard items: pens (blue/black preferred), pencils (including colored), tape, eraser, ruler, highlighters

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Special items: nil

you do not have any unauthorised material. If you have any unauthorised material with you, hand it to the supervisor before entering the examination room. It is **your responsibility** to ensure that

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of examination
Section One: Calculator-free	8	8	50	51	34
Section Two: Calculator-assumed	13	13	100	101	66
Total					100

Instructions to candidates

1. The rules for the conduct of examinations are detailed in the school handbook. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer booklet.
3. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
4. Additional working space pages at the end of this Question/Answer booklet are for planning or continuing an answer. If you use these pages, indicate at the original answer, the page number it is planned/continued on and write the question number being planned/continued on the additional working space page.
5. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you do not use pencil, except in diagrams.
7. The Formula sheet is **not** to be handed in with your Question/Answer booklet.

(3)

$$\frac{\frac{\partial}{\partial x}y}{(x^3 - x^5)} = y \quad (\text{!!})$$

(2)

$$(i) \quad y = e^{2x} \times \cos(2x)$$

- (a) Find $\frac{dy}{dx}$ and simplify the expression for each of the following

(5 marks)

Question 1

Working time: 50 minutes.

This section has **eight (8)** questions. Answer **all** questions. Write your answers in the spaces provided.

Section One: Calculator-free
35% (51 Marks)

Question 2

Evaluate the following

(a) $\int_{\frac{\pi}{6}}^{\frac{\pi}{2}} \cos(2x) dx$ (3)

(b) $\int_1^3 (x^2 - 4x^3) dx$ (2)

Integrate

(c) $\int e^{0.5x} dx$ (2)

(d) $\int \frac{4x^3 + 3}{x^2} dx$ (2)

(e) $\int 5(2x - 3)^3 dx$ (2)

- (3) (c) Find when the particle changes direction.

- (2) (b) Hence find the velocity and displacement at $t = 2$ s.

- (4) (a) Find the velocity and the displacement equations.

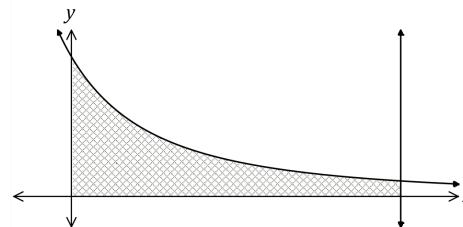

The acceleration of a particle is given by $a = -6t + 6 \text{ m s}^{-2}$ for $t \geq 0$ and it is known that $v_0 = -3 \text{ m s}^{-1}$ and $x_0 = 4 \text{ m}$.

Question 3 (9 marks)

Question 4**(5 marks)**

The graph below shows the curve $y = \frac{180}{(2x+5)^2}$ and the line $x=5$.

Determine the area of the shaded region, enclosed by the x -axis, the y -axis, the line $x=5$ and the curve.

END OF QUESTIONS

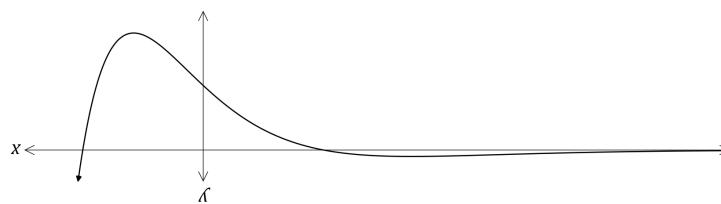

stationary points is a local minimum and that the other is a local maximum.

(3 marks)

(2 marks)

- (b) Determine the $x - \textcolor{red}{c}$ -coordinate/s of the stationary points of $f(x)$.

(1 mark)

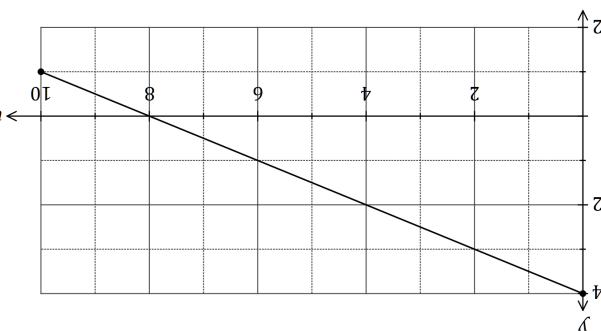

The graph of $y = f(x)$ is shown below, where $f(x) = e^x(x^2 - 3)$.

(6 marks)

Question 5

Question 8

- The graph of $y = f(t)$ is shown below over the interval $0 \leq t \leq 10$.

(2 marks)

(4 marks)

$$(b) \text{ On the axes below, sketch the graph of } y = F(x) \text{ for } 0 \leq x \leq 10, \text{ where } F(x) = \int_x^0 f(t) dt.$$

- (c) Given that $f''(x) = e^x(x^2 + 4x - 1)$, use the second derivative to justify that one of the stationary points is a local minimum and that the other is a local maximum.

(3 marks)

Question 6

(6 marks)

The table below shows the probability distribution for a random variable X .

It is known that $E(X)=1.7$ and $\text{Var}(X)=1.41$.

x	0	1	2	3
$P(X=x)$	a	$a+b$	b	$2a$

- (a) Determine the values of the constants a and b .

(4 marks)

- (b) Determine

(i) $E(3-2X)$.

(1 mark)

(ii) $\text{Var}(3-2X)$.

(1 mark)

Question 7

(3 marks)

- (a) The function f is such that $f(1)=-2$ and $f'(x)=\sqrt{3+x^2}$. Use the increments formula to determine an approximate value for $f(1.05)$.

(3 marks)
