Question number: \_\_\_\_\_

## Instructions to candidates

1. The rules for the conduct of the Western Australian Certificate of Education ATAR course examinations are detailed in the *Year 12 Information Handbook 2016*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in this Question/Answer booklet.
3. You must be careful to confine your answers to the specific questions asked and to follow any instructions that are specific to a particular question.
4. Additional pages for the use of planning your answer to a question or continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number.
5. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
6. It is recommended that you **do not use pencil**, except in diagrams.
7. The Formula sheet is **not** to be handed in with your Question/Answer booklet.

(8 marks)

### Question 1

(2 marks)

(2 marks)

c) Determine  $f \circ g(x)$  and its natural domain.

a) Determine  $g \circ g(x)$  (Simplify)  
Let  $f(x) = \sqrt{x - 4}$  and  $g(x) = \frac{1}{x - 2}$ .

Working time: 50 minutes.

This section has **seven (7)** questions. Answer all questions. Write your answers in the spaces provided.

Responses and/or as additional space if required to continue an answer.

• Planning: If you use the space pages for planning, indicate this clearly at the top of the page.

• Continuuing: If you need to use the space to continue an answer, indicate this clearly in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.

• Placing: If you need to use the space for planning, indicate this clearly at the top of the page.

• Original answer space: If you need to use the space to continue an answer, indicate this clearly in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.

Additional working space

Question number:

Section One: Calculator-free  
(49 Marks)

**Question 2****(4 marks)**

Let  $\frac{11-16i}{a-2i} = 3+bi$  where  $a$  &  $b$  are real constants. Determine all possible value(s) of  $a$  &  $b$ .

**Additional working space**

Question number: \_\_\_\_\_

**Question 3****(6 marks)**

Solve for  $x, y$  &  $z$  in the following system of linear equations.

$$2x + z = 4$$

$$2x + 3y + 3z = 3$$

$$5x + y + 3z = 10$$

Question 7  
(6 marks)

A, B & C are 3 distinct points with non-zero position vectors  $\vec{a}, \vec{b} \text{ & } \vec{c}$  respectively.

$$\frac{(\vec{c} - \vec{x})(\vec{1} + \vec{x})}{(\vec{c} + \vec{x})} = (\vec{x})^2$$

Sketch the following function on the axes below showing all major features.

Question 4  
(9 marks)

a) If  $\vec{q} \times \vec{c} = \vec{q} \times \vec{c}$  what can be deduced about  $OC$  and  $AB$ ? Explain. (3 marks)

b) If  $\vec{a} + \vec{b} + \vec{c} = 0$  what relationship exists between  $\vec{a} \times \vec{b}$  &  $\vec{b} \times \vec{c}$ ? (3 marks)

c) If  $\vec{c} \neq 0$  and  $\vec{q} \times \vec{c} = \vec{c} \times \vec{q}$ , prove that  $\vec{a} + \vec{b} = k\vec{c}$  for some scalar  $k$ . (3 marks)

Given the following property of cross products  $\vec{b} \times (\vec{b} + \vec{w}) = \vec{b} \times \vec{b} + \vec{b} \times \vec{w}$  and  $|\vec{d} \times \vec{b}| = |\vec{b}| |\vec{d}| \sin \theta$  answer the following:

**Question 5****(9 marks)**

- a) Determine all roots of  $z^6 = -2 + 2\sqrt{3}i$  in exact polar form with principal arguments.  
(4 marks)

- b) Plot all of these roots on the graph below showing all major features. (2 marks)

- c) If all the consecutive roots are joined by a straight line, determine the exact area of the polygon formed.  
(3 marks)

**Question 6****(7 marks)**

Determine all solutions of the following equations:

- a)  $z^4 - 2z^2 + 4 = 0$  and express in exact polar form with principal arguments.  
(4 marks)

- a)  $z^2 + 2z - \sqrt{3}i = 0$  and express in exact cartesian form.  
(3 marks)
