

ROSSMOYNE SENIOR HIGH SCHOOL

ROSSMOYNE
SENIOR HIGH SCHOOL
Semester Two Examination, 2012
YR11/12

Question/Answer Booklet

MATHEMATICS 2C/2D

Section One:
Calculator-free

Time allowed for this section
Reading time before commencing work: five minutes
Working time for this section: fifty minutes

Teacher's name _____

Your name _____

Materials required/recommended for this section

To be provided by the supervisor
Standard items: pens, pencils, pencil sharpener, eraser, correction fluid/tape, ruler, highlighters

Special items: nil

Important note to candidates

No other items may be used in this section of the examination. It is **YOUR** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

Structure of this paper

Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	7	7	50	50	33
Section Two: Calculator-assumed	12	12	100	100	67
Total			150	100	

Additional working space

Question number: _____

Instructions to candidates

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2012*. Sitting this examination implies that you agree to abide by these rules.
2. Write your answers in the spaces provided in this Question/Answer Booklet. Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are continuing to answer at the top of the page.
3. **Show all your working clearly.** Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
4. It is recommended that you **do not use pencil**, except in diagrams.

(2 marks)

- (d) Solve the equation $(3x - 2)(x + 5) = 0$

(1 mark)

$$(ii) \quad 9x^2 - 4.$$

(1 mark)

- (iii) Is the statement true or false?

(1 mark)

$$(i) \quad x^2 - x - 20.$$

(c) Factorise

(2 marks)

(1 mark)

$$(b) \quad \text{Find } f(3) \text{ if } f(x) = 2x^2 - 4x - 3.$$

(1 mark)

- (iii) Do your examples suggest that the statement is true or false?

(2 marks)

$$(a) \quad \text{Simplify the expression} \quad \frac{4 \times 5^3}{2^2 \times 5^5}.$$

Question 1

(50 Marks)

Section One: Calculator-free

- (i) Systematically check this statement with three examples.

This section has seven (7) questions. Answer all questions. Write your answers in the spaces provided.

Working time for this section is 50 minutes.

- (a) Consider the statement that the sum of two consecutive odd counting numbers is always divisible by four.

(b) Consider the statement that the sum of three consecutive terms of the Fibonacci sequence (1, 1, 2, 3 ...) is always a multiple of six.

- (i) Check this statement.

(ii) Do your examples suggest that the statement is true or false?

- (iii) Do your examples suggest that the statement is true or false?

Question 2

The coordinates of four points are A(2, -1), B(1, 2), C(0, 5) and D(4, 8).

- (a) Determine the gradient of the Line 1, which passes through A and B. (2 marks)

- (b) Line 2 passes through point C and has a gradient of $\frac{1}{3}$.
Write down the equation of this line. (1 mark)

- (c) Explain whether Line 1 and Line 2 are parallel, perpendicular or neither. (2 marks)

- (d) Calculate the distance between points C and D, if one unit is one centimetre. (2 marks)

(7 marks)

Question 6

The graphs (A, B, C, D and E) and equations (P, Q, R, S and T) of five functions are shown below.

P $y = 2^x$

Q $y = -(x - 3)^2 + 4$

R $y = \frac{1}{x}$

S $4x + 3y = 12$

T $y = x^3 - 6x^2 + 12x - 6$

- (a) Write down the letter of the **graph** which is an example of (1 mark)

- (i) an exponential function

(1 mark)

- (ii) a cubic function (1 mark)

- (b) Write down the letter of the **equation** which is an example of (1 mark)

- (i) a quadratic function

(1 mark)

- (ii) a reciprocal function (1 mark)

- (c) Give the coordinates of (1 mark)

- (i) the y-intercept of the linear function

(1 mark)

- (ii) the turning point of the parabola (1 mark)

- (d) If only 25 swimmers had been surveyed, how many of these would you expect to be males who say that they swim regularly? (2 marks)

- (d) Which is the better measure to compare the spread of scores in these two tests - the range or the standard deviation? Justify your choice. (2 marks)

- (c) If one of those surveyed said they did not swim regularly, are they more likely to be female or male? Justify your answer. (2 marks)

- (c) Test B larger than, smaller than, or equal to 2.18? Explain your answer. (2 marks)

	Total	Swam regularly	Did not swim regularly	Total
Female				
Male				
Total				

- (b) Complete this two-way table using the above information. (3 marks)

- (b) What is the range of scores in Test A? (1 mark)

- (a) If one of the swimmers surveyed was chosen at random, what is the probability that they did not swim regularly? (1 mark)

- (a) The mean score was 13.9 for Test A. Is the mean of scores in Test B larger than, smaller than, or equal to 13.9? Explain your answer. (2 marks)

- In a random survey of 100 swimmers at a council owned pool, three-quarters said they swam regularly. 35 males said they swim regularly and 10 more males than females were surveyed.

- A class sat two tests and the scores of the students in each are shown below.

- Question 5 (8 marks)

- MATHEMATICS 2C/2D CALCULATOR-FREE

- 5

- Question 5 (7 marks)

- MATHEMATICS 2C/2D CALCULATOR-FREE

- 8

(9 marks)

Question 4

- (a) The graph of $y = -2(x - 3)^2 + 8$ is drawn below.

For this graph, determine

- (i) the equation of the line of symmetry

(1 mark)

- (ii) the coordinates of the turning point

(1 mark)

- (iii) the coordinates of the y-intercept

(1 mark)

- (iv) the equation of the graph in the form $y = -2(x - a)(x - b)$, where a and b are integers.

(1 mark)

- (b) Draw the graph of $y = \frac{1}{x}$ on the axes below.

(3 marks)

- (c) Two of the functions $y = 2^x$, $y = x^3$ and $y = x^2$ were used to create Table A and Table B below. On the line below each table, write the function used.

(2 marks)

x	0	1	2
y	0	1	8

Table A

x	0	1	2
y	1	2	4

Table B

x	0	1	2
y	0	1	8
