Instructions to candidates

- The rules for the conduct of the Western Australian Certificate of Education ATAR
 course examinations are detailed in the Year 12 Information Handbook 2016. Sitting this
 examination implies that you agree to abide by these rules.
- 2. Write your answers in this Question/Answer booklet.
- You must be careful to confine your answers to the specific questions asked and to follow any instructions that are specific to a particular question.
- 4. Additional pages for the use of planning your answer to a question or continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number.
- 5. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
- 6. It is recommended that you do not use pencil, except in diagrams.
- 7. The Formula sheet is **not** to be handed in with your Question/Answer booklet.

CALCULATOR - FREE

(52 Marks) Section One: Calculator-free

This section has nine (9) questions. Answer all questions. Write your answers in the spaces

responses and/or as additional space if required to continue an answer. Spare pages are included at the end of this booklet. They can be used for planning your

number of the question that you are continuing to answer at the top of the page. original answer space where the answer is continued, i.e. give the page number. Fill in the • Continuing an answer: If you need to use the space to continue an answer, indicate in the Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.

Working time: 50 minutes.

(5 marks)

Question 1

Solve the following

(1 mark)

 $\frac{2}{5} + \frac{12}{5} = \frac{12}{5} =$

(5 marks)

 $z = \frac{\lambda}{x} - \frac{s}{x\epsilon}$ (d)

\$5 10 to = x1

(2 marks)

/ 1=x 10 +1-=x (0=x ...) 0 = (1-x)(++x)x D = (+ - x & + 2) x

Question 8

(a) Determine y when x = 23.

(e warks)

A relationship between x and y is given by $x = x + \sqrt{\frac{1}{2}} = x$

(S warks)

(5 marks)

(z marks)

(b) State, with justification, whether x is a function of y.

(2 marks)

(2 marks)

State, with justification, whether is proportional to y.

X is not proportional to y.

X is not proportional to y.

X is not proportional to y.

(4 marks)

(z warks)

ด นอกรอกก

passing through the lamp. When Q = 1000, I = 2. The quantity of light, Q, given out by a lamp is proportional to the square of the current, I,

Write an equation that relates \emptyset and λ . A = $\frac{1000}{24}$

(1 mark)

(b) Find the value of Q when I = 3.

6 x025 = D

(c) What happens to Q when I is doubled.

Q increases by a tador of 22 = 4.

CALCULATOR-FREE

Not to Question 2

(12 marks)

A brother and sister are out playing fetch with their dog on a straight slope. The three are spread out evenly with the dog being directly (half-way) in between the brother and the sister.

When modelled on a cartesian plane, the dog's position can be considered as (7.5 25) and the sister's position can be considered as (10,3)

3

(2 marks)

Determine the coordinates of the brother. 2.5

$$B_{r} = (7.5 - 2.5, 2.5 - 0.5)$$

$$= (5, 2)$$

Determine the equation of the slope.

(3 marks)

$$m_1 = \frac{3-2}{10-5} = \frac{1}{5}$$

(c) The brother is flying a kite. If the line of the kite is running perpendicular to the slope, determine the equation that models the line.

$$m_{1} \times m_{2} = -1$$
 $= -5x + c$
 $= -5x + 27$

(d) The sister throws the ball away from the dog and the path of the ball can be modelled by the following quadratic equation.

underatic equation. Since
$$y = -\frac{x^2}{2} + x + 1$$

Determine the coordinates that the ball first lands on the slope.

(4 marks)

x(x-1.6) = 0 or x = 1.6 As (0,1)As (0,1)

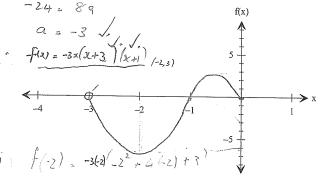

MATHEMATICS METHODS 1 & 2 CALCULATOR-FREE Question 7 Given $f(x) = ax(x^2 + 4x + 3)$, $-3 < f(x) \le 0$ and f(1) = -24

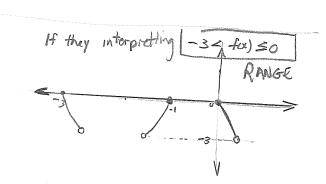

(a) Rewrite the function in factorised form, stating the value of a. $-24 = 90(1^2 + 4(1) + 3)$

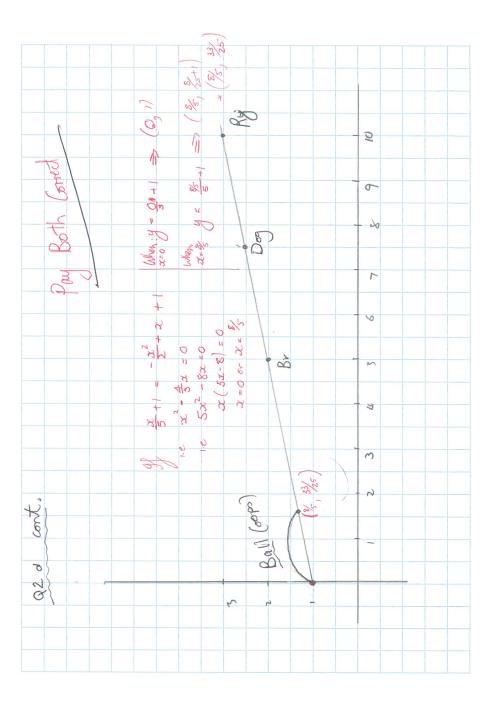

(3 marks)

(b) Sketch the function on the given domain.

(3 marks)

MATHEMATICAL METHODS 1 & 2

CALCULATOR - FREE

(7 marks) Question 6

Given the equation
$$2^{x+1} + 2^{3-x} = 17$$
, $x \in \mathbb{R}$,

use a suitable substitution to rewrite the equation above as a quadratic equation.

$$2^{x} \times 2^{1} + 2^{3} \times 2^{-x} = 17$$

$$2(2^{x}) + \frac{8}{2^{x}} = 17$$

$$2y^{2} + 8 = 17y$$

$$2y^{2} - 17y + 8 = 0$$

$$2 \times 2^{x} + 8 = 17y$$

$$3 \times 2^{x} + 8 = 17y$$

$$4 \times 2^{x} = 17y$$

$$5 \times 2^{x} + 8 = 17y$$

$$6 \times 2^{x} = 17y$$

$$7 \times 2^{x} + 8 = 17y$$

$$8 \times 2^{x} = 17y$$

$$9 \times 2^{x}$$

(4 marks) hence, determine the solution(s) to the exponential equation. (q)

$$2y^2 - 17y + 8 = 0$$

$$(2y - 1)(y - 8) = 0$$

$$y = \frac{1}{2} \qquad \text{or} \qquad y = 8$$

$$x = -1 \qquad \text{or} \qquad x = 3$$

$$x = -1 \qquad \text{or} \qquad x = 3$$

$$x = -1 \qquad \text{or} \qquad x = 3$$

Question 3

(3 marks)

Find in terms of
$$p$$
 the remainder when $x^3 - 2x^2 + px - 6$ is divided by $x - 2$.

$$x^2 + p$$

$$x^3 - 2x^2 + px - 6$$

$$x^3 - 2x^2 + px - 6$$

$$x - 2x - 2x - 2x - 2x - 2$$

$$- 2x - 2x - 2x - 2x - 2$$

$$- 2x - 2x - 2x - 2x - 2$$

$$- 2x - 2x - 2$$

. The remainder to 2p-61.

Question 4

(3 marks)

Points M(p,6) and N(1,-2) are the end points of line segment MN. If the midpoint of line is (-3, q). Determine the value of p and q.

$$\frac{P+1}{2} = -3 /.$$

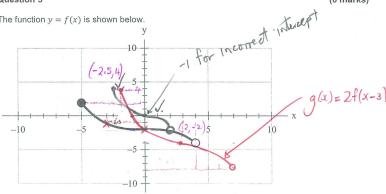

MATHEMATICS METHODS 1 & 2

CALCULATOR-FREE

Question 5

(6 marks)

The function y = f(x) is shown below.

6

State the range of f(x).

Sf(x: R: -4<f(x) ≤ 2}

(1 mark)

(b) Another function is given by g(x) = 2f(x-3).

Describe the transformation required to produce g(x) from f(x). Any Order (i) Translation 3 to the Right followed (ii) Dilation scale factor x2//to y-axi

State the coordinate of the y-intercept under this transformation.

 $(0,-2)\sqrt{.}$

(c) On the same axes above, sketch the graph of y = f(2x) + 2.

(2 marks)
