Materials required/recommended for this section To be provided by the supervisor

This Question/Answer Booklet Formula Sheet (retained from Section One)

To be provided by the candidate

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: drawing instruments, templates, notes on two unfolded sheets of A4 paper, and up to three calculators approved for use in the WACE examinations

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor before reading any further.

This examination paper may be freely copied, or communicated on an intranet, for non-commercial purposes within educational institutes that have purchased the paper from WA Examination Papers provided that WA Examination Papers is acknowledged as the copyright owner. Teachers within Rossmoyne Senior High School may change the paper provided that WA Examination Paper's moral rights are not infinged.

Copying or communication for any other purposes can only be done within the terms of the Copyright Act or with prior written permission of WA Examination papers.

Instructions to candidates

- The rules for the conduct of Western Australian external examinations are detailed in the Year 12 Information Handbook 2015. Sitting this examination implies that you agree to abide by these rules.
- Write your answers in this Question/Answer Booklet.
- You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
- Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question that you are continuing to answer at the top of the page.
- Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat any question, ensure that you cancel the answer you do not wish to have marked.
- It is recommended that you do not use pencil, except in diagrams.
- The Formula Sheet is **not** to be handed in with your Question/Answer Booklet.

Question 10

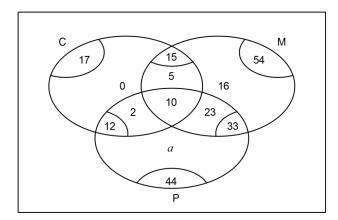

CALCULATOR-ASSUMED

(5 marks)

(1 mark)

(1 mark)

The following Venn diagram shows the numbers of students electing to study at least one of Chemistry (C), Math (M) or Physics (P) in upper school.

(a) Determine the value of a.

$$a = 44 - 23 - 10 - 2$$

$$= 9$$

(b) Determine $n(C \cup M \cup P)$.

$$n(C \cup M \cup P) = 54 + 0 + 2 + 9$$

= 65

- (c) If one student is selected at random from the group, determine the probability
 - (i) they elected to study math but not physics.

$$P(M \cap \overline{P}) = \frac{16+5}{65} = \frac{21}{65}$$

(ii) they elected to study math and physics, given that they did not study chemistry.

(1 mark)

$$P(M \cap P \mid \overline{C}) = \frac{23}{65 - 17} = \frac{23}{48}$$

(iii) they elected to study two subjects, given that they did not elect to study all three subjects. (1 mark)

$$P = \frac{5 + 23 + 2}{65 - 10} = \frac{30}{55}$$

$$5 \times 12 \times 52$$

$$5 \times 12 \times 52$$

$$\nabla CBV = 1.219''$$

$$\cos \angle CBV = 0.6094''$$

$$\cos \angle CBV = \frac{2 \times 25 \times 25}{25^2 + 25^2 - 15^2}$$

82.78 =
$$(612.1 \text{ mis} - 612.1) \times {}^{2}62 \times \frac{1}{2}$$

$$20.805 = 82.78 + 44.022$$
 mos $0.805 \approx 308.02$

Segment CAD:

6 Question 12 (6 marks)

Software has been developed to classify an email message as either good or spam. The software is not perfect: only 88% of spam is classified as such, and 4% of emails that are good are classified as spam.

A large number of emails, 15% of which were spam, were checked by the software.

What is the probability that the software will classify a randomly chosen email as spam? (3 marks)

Let S=Spam email and C=Classified as spam by software

$$P(C \cap S) + P(C \cap \overline{S})$$

$$= 0.15 \times 0.88 + 0.85 \times 0.04$$

$$=0.132+0.034$$

$$= 0.166$$

Given that the software classifies an email as good, what is the probability that it is actually spam. (3 marks)

$$P(\overline{C}) = 1 - 0.166$$

$$= 0.834$$

$$P(S|\overline{C}) = \frac{P(S \cap \overline{C})}{P(\overline{C})}$$

$$= \frac{0.15 \times 0.12}{0.834}$$

$$= \frac{0.018}{0.834}$$

$$= \frac{3}{139} \approx 0.0216$$

(b) The displacement, x m, of a particle from a fixed point O is given by $x = 2t^3 - 3t^2 - 12t + 1$, $t \ge 0$, where t is the time, in seconds.

15

Determine the initial velocity of the particle.

$$v = x'(t) = 6t^2 - 6t - 12$$

 $v(0) = -12$ m/s

Determine the displacement of the particle at the instant it is stationary. (2 marks)

$$v(t) = 0 \implies 6t^2 - 6t - 12 = 0$$
 $t = -1, t = 2$
 $x(2) = -19 \text{ m}$

CALCULATOR-ASSUMED

For two events, A and B, $P(A\cap \overline{B})=0.3$, $P(\overline{A}\cap \overline{B})=0.1$ and $P(B\cap \overline{A})=x$.

Determine an expression for $P(A \cap B)$ in terms of x. (2 marks)

$$x - 1.0 - \xi.0 - 1 = (A \cap A)q$$
$$x - 0.0 =$$

(1 mark) . (A) 10 alone value of (A) 10 state the maximum possible value of (A) 10 state (A) 10

$$6.0 = (h)^{q} \Leftarrow 0 = x$$

Determine the value of \boldsymbol{x} under each of the following conditions.

(i) A and B are mutually exclusive. (1) And
$$(1 + 1)^{-1}$$

$$6.0 = x \Leftarrow 0 = (A \cap A)q$$

 $\frac{1}{\delta} = (B \mid A) q$ (S marks)

$$\frac{1}{c} = \frac{x - 8.0}{8.0}$$

$$21.0 = x - 8.0$$

$$84.0 = x$$

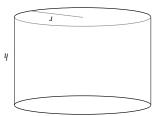

(3 marks) . a to tnebneqebni si A(iii)

$$x - 3.0 = (3.0)(x - 3.0 + \xi.0)$$
$$x - 3.0 = x3.0 - \lambda \xi.0$$
$$30.0 = x4.0$$
$$\xi 1.0 = \frac{\xi}{02} = x$$

(10 marks) Question 20

ォレ

A cylinder is such that the sum of the height and three times the radius is 50 cm.

(1 mark) (i) Write an equation for the height, h, in terms of the radius, r, for this cylinder.

$$y + 3y = 50$$
 $\Rightarrow h = 50 - 3y$

Show that the total surface area of the cylinder is given by $A=100\pi r-4\pi r^2$.

$$\lambda = 2\pi r h + 2\pi r^{2}$$

$$= 2\pi r (3c - 3r) + 2\pi r^{2}$$

$$= 100\pi r - 4\pi r^{2}$$

(3 marks) maximum possible surface area, and state this area. Using calculus techniques, determine the dimensions of this cylinder to obtain the (iii)

$$7\pi 8 - \pi 001 = \frac{\hbar b}{\tau b}$$

$$0 = 100\pi - 8\pi r \Rightarrow r = 12.5 \text{ cm}$$

$$0 = 100 = 0$$

$$0 = 100.3 \text{ cm}$$

$$0 = 100.3 \text{ cm}$$

$$0 = 100.3 \text{ cm}$$

8 **Question 14** (9 marks)

Sequence A is geometric and has n^{th} term ($n \ge 1$) given by $T_n = 5(0.8)^n$.

What is the first term of Sequence A? (1 mark)

$$T_1 = 4$$

How many terms of Sequence A are greater than 1? (1 mark)

A student added together the first *m* terms of Sequence A and obtained a total between 21.9 and 22. Explain why the student must have made a mistake, even though the number m is not known. (2 marks)

> The sum to infinity for this sequence is 20, so impossible for any number of terms to exceed this number.

Sequence B is also geometric with a common ratio of 1.2. The sum of its first two terms is 0.22.

Determine the first term of Sequence B. (2 marks)

$$a+1.2a=0.22$$

 $a=0.1$

How many terms of Sequence B are less than 1? (1 mark)

What is the fewest number of terms of Sequence B that must be summed to obtain a total of at least 100? Justify your answer. (2 marks)

30 terms.
$$S_{29} \approx 98.4$$
 $S_{30} \approx 118.2$

Question 19 (6 marks)

- The quantity P is directly proportional to the quantity T, and it is known that when T = 12,
 - Determine an equation for the relationship between P and T. (2 marks)

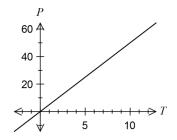

$$P = kT$$

$$60 = k \times 12 \implies k = 5$$

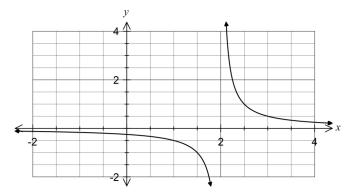

$$P = 5T$$

CALCULATOR-ASSUMED

Sketch a graph of the relationship between P and T. (2 marks)

The graph below shows $y = \frac{a}{x-b}$, where a and b are constants.

Determine the values of a and b.

(2 marks)

From vertical asymptote, b = 2.

Using (2.5, 1),
$$1 = \frac{a}{2.5 - 2} \implies a = 0.5$$

(S marks)

(i)

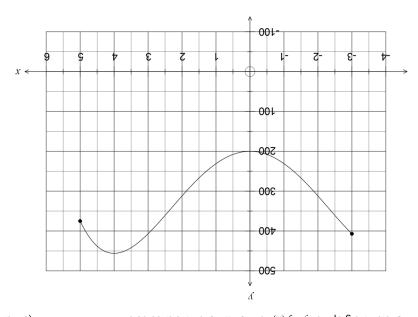

(7 marks)

A function is given by $f(x) = 200 + 32x^2 - x^4$ for $-3 \le x \le 5$. Question 15

function for the given domain. Use calculus techniques to determine the coordinates of both stationary points of the

6

(3 marks) Sketch the graph of y = f(x) for $-3 \le x \le 5$ on the axes below.

(8 marks) Question 18

July 2009 and was 6,774,705,647 one month later on the first of August. A government organisation estimated that the world population was 6,783,187.02 on the first of

15

If the population is assumed to be growing exponentially, determine

the monthly percentage growth rate in the population. (S marks)

o.000965983 \times 100 = 0.0966% per month E89289000.1 = 2177718870 ÷ 7482074770

an expression for the population 1 months after the first of July 2009. (z marks)

1(586596000.1)2177518876

the world population on the first of July 2010, to the nearest million. If this rate of growth continues, determine

noillim 748 8 ≈ $6768167712(1.000965983)^{12} = 6847041102$

(2 marks) in which year and month the population of the world was expected to reach 7,000 (ii)

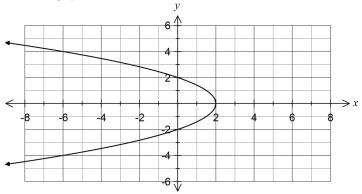

shinom 88.4 & E = 1 6 01× 7 = 1 (\$86\$06000.1)21 7 76189 7 8

During May 2012.

See next page See next page

10 **Question 16** (8 marks)

Sketch the graph of $y^2 = 4 - 2x$. (3 marks)

State, with reasons, whether these relationships are also functions:

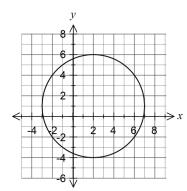

(i)
$$y^2 = 4 - 2x, x \ge 0.$$
 (1 mark)

No - graph fails vertical line test.

(ii)
$$y^2 = 4 - 2x, y \ge 0.$$
 (1 mark)

Yes - there is a one-to-one mapping.

The equation of the following graph is $x^2 + y^2 + ax + by = c$. Determine the values of a, band $\it c$. (3 marks)

$$(x-2)^{2} + (y-1)^{2} = 5^{2}$$

$$x^{2} + y^{2} - 4x - 2y = 20$$

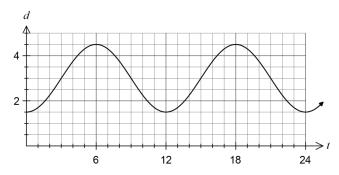

$$a = -4, b = -2, c = 20$$

11 **Question 17** (9 marks)

The depth of water in a harbour, d measured in metres, t hours after midnight, can be modelled by the function $d(t) = a\cos(bt) + c$.

The minimum depth of 1.5 meters first occurred at midnight, followed by a maximum of 4.5 metres six hours later.

Sketch how the depth varied over the first 24 hours on the axes below. (3 marks)

Explain, with reasoning, why a=-1.5, $b=\frac{\pi}{6}$ and c=3. (3 marks)

c is mean depth of water:

$$c = \frac{1.5 + 4.5}{2} = 3$$

b adjusts period to 12 hours:

$$b = \frac{2\pi}{12} = \frac{\pi}{6}$$

a is amplitude of function:

$$1.5 = a\cos(0) + 3 \implies a = -1.5$$

For what percentage of a day is the depth of water at least 2.5 metres? (3 marks)

Solve $2.5 = -1.5\cos(\frac{\pi t}{6}) + 3$ to get first solution of t = 2.351.

$$\frac{6 - 2.351}{6} \times 100 = 60.8\%$$
