Section	Number of questions available	Number of questions to be answered	Working time (minutes)	Marks available	Percentage of exam
Section One: Calculator-free	8	8	50	52	35
Section Two: Calculator- assumed	13	13	100	98	65
			Total	150	100

Instructions to candidates

- The rules for the conduct of examinations are detailed in the School Examination Rules provided with your exam timetable. Sitting this examination implies that you agree to abide by these rules.
- Write your answers in this Question/Answer Booklet.
- You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
- Spare pages are included at the end of this booklet. They can be used for planning your responses and/or as additional space if required to continue an answer.
 - Planning: If you use the spare pages for planning, indicate this clearly at the top of the page.
 - Continuing an answer: If you need to use the space to continue an answer, indicate in the original answer space where the answer is continued, i.e. give the page number. Fill in the number of the question(s) that you are continuing to answer at the top of the page.
- Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any guestion or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
- It is recommended that you do not use pencil, except in diagrams.
- The formula sheet and your notes are not to be handed in with your Question/Answer Booklet.

Question 8 (7 marks)

(a) The graph of the relation $y^2 = x$ passes through the points (16, a) and (b, -5). Determine the values of a and b. (3 marks)

(b) Another relation is defined by $(L \times L)^2 + (L \times L)^2 = 4$.

(i) Sketch the graph of this relation on the axes below. (3 marks)

(ii) What feature of the graph indicates that a relation rather than a function is shown? (I mark)

Question 4

(5 marks)

The graph of the line L_1 is shown below.

(a) Determine the equation of L_1 .

(2 marks)

Two points are located at A(-10,5) and B(6,29).

(b) Line L_2 is perpendicular to L_1 and passes through the mid-point of A and B. Determine the equation of L_2 . (3 marks
