Calculator-free	

Materials required/recommended for this section To be provided by the supervisor This Question/Answer Booklet

To be provided by the candidate

Standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters

Special items: nil

Formula Sheet

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Instructions to candidates

 The rules of conduct of the CCGS assessments are detailed in the Reporting and Assessment Policy. Sitting this assessment implies that you agree to abide by these rules.

2

- Write your answers in this Question/Answer Booklet using a blue/black pen. Do not use erasable or gel pens.
- Answer all questions.
- 4. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
- 5. Supplementary pages for the use of planning/continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.
- 6. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
- 7. It is recommended that **you do not use pencil**, except in diagrams.

Question n

Question 7 (6 marks)

MATHEMATICS METHODS Year 11

(a) Determine the antiderivative of

Question 1

(a) Determine x if the terms 12,x,27 are three consecutive terms of an arithmetic sequence.

9

CALCULATOR-ASSUMED

(i) $12x^3 - 2x^2 - 1$

(6 marks)

(b) Determine T_{10} of the arithmetic sequence where $T_1=x-3$, $T_2=2x+1$ and $T_3=4x-1$.

ii) $\frac{\pi^{3}}{x^{3}}$ (3 marks)

(b) Express y in terms of x if $\frac{dy}{dx} = 6xx - 3x + 4$ and y = 14 when x = 2.

End of questions

Question 2

(8 marks)

Consider the following recursive rule $T_{n+1} = T_n - 3$, $T_1 = 8$.

State the first 4 terms in the sequence.

(2 marks)

Determine a rule for the $n^{\rm th}$ term of this sequence.

(2 marks)

Determine the value of the 52nd term.

(1 mark)

(3 marks)

Determine the first term in the sequence which is less than -500.

Question 6 continued

CALCULATOR-ASSUMED

Calculate the total distance travelled by the particle during the first six seconds. (3 marks)

See next page

See next page

(b) Determine the length of time it takes for the account to reach a balance of \$0. (2 marks)	ne decimal place. (2 mark <i>s</i>)	(d) Determine when the particle is at rest. Round your answer to o
	(2 тағка)	(c) Calculate the speed of the particle at three seconds.
	(1 mark)	(b) Determine the velocity of the particle at any time t seconds.
Question 3 Ruth's mother deposited some money into her daughter's savings account for her birthday. Ruth decided to withdraw the same amount of money each month to pay off a purchase she had made. After 4 months, she had \$850 remaining in the account and after 14 months, \$600 remained in the account. (a) Determine the amount of the initial deposit and the amount withdrawn each month. (3 marks)	(9 marks) ss, at any time t, (1 mark)	Question 6 A particle undergoing rectilinear motion has its displacement, in metre seconds, given by the equation $x(t) = \frac{t^3}{3} - t^2 - 4t - 3$. (a) Determine the displacement of the particle at six seconds.

Question 4 (6 marks)

6

A particle, P, is able to travel backwards and forwards along a straight line. The displacement, in metres, of the particle relative to point O, is shown on the graph below for the interval $0 \le t \le 8$ seconds.

- (a) State an interval of time during which the particle is moving towards point *O*. (1 mark)
- (b) State the value of t for which the particle is stationary.

(1 mark)

- (c) Determine the total distance that the particle travelled during the 8 second interval. (1 mark)
- (d) By showing use of an appropriate average rate of change, determine the velocity of the particle when t=6. (3 marks)

MATHEMATICS METHODS Year 11

Question 5

(3 marks)

The arithmetic series $23 + 32 + 41 + 50 + \cdots + 2534$ has a sum of 357 980.

(a) Determine the 100th term in the series.

(2 marks)

(1 mark)

Determine the number of terms in the series.

The rules of conduct of the CCGS assessments are detailed in the Reporting and Assessment Policy. Sitting this assessment implies that you agree to abide
