Instructions to candidates

 The rules of conduct of the CCGS assessments are detailed in the Reporting and Assessment Policy. Sitting this assessment implies that you agree to abide by these rules.

2

- Write your answers in this Question/Answer Booklet using a blue/black pen. Do not use erasable or gel pens.
- Answer all questions.
- 4. You must be careful to confine your response to the specific question asked and to follow any instructions that are specified to a particular question.
- 5. Supplementary pages for the use of planning/continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.
- 6. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than one mark, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
- 7. It is recommended that **you do not use pencil**, except in diagrams.

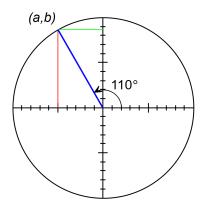

(1 mark)	(ii) cos(120)
(1 mark)	(c) Find the exact value of the following.
(१ णग्रह्म)	(b) Convert $\frac{7\pi}{81}$ radians to degrees.
MATHEMATICS METHODS Year 11 (5 marks) (1 mark)	CALCULATOR-FREE 3 Question 1 (a) Convert 80° to radians.

(1 mark)

 $(\frac{\pi}{6}-)$ nis (iii)

Question 2 (2 marks)

Information has been added to the unit circle below.

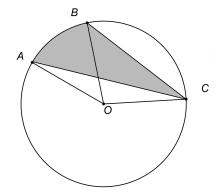

Determine the following trigonometric ratios in terms of a and b.

(a)
$$\sin(70)^{\circ}$$
 (1 mark)

(b)
$$\tan(250)^{\circ}$$
 (1 mark)

Determine the area of the shaded region ABC in the circle below with the centre O and radius 24 cm, given that $\angle AOB = \frac{\pi}{5}$ and $\angle BOC = \frac{3\pi}{5}$. Give your answer to the nearest square centimetre.

Question 3 (3 marks)

A design for a pendant is an equilateral triangle inside a circle of radius 4 cm. Show that the area of the pendant, excluding the triangle, is $16\pi-12\sqrt{3}$ cm².

Question 8 (7 marks)

9

An arc of length 15 cm on a circle of radians 8 cm subtends an angle of θ at the centre. (a) Determine the exact size of θ in radians (2)

(a) Determine the exact size of θ in radians. (2 marks)

(b) Calculate the area of the sector which has θ as the included angle. (2 marks)

be found by calculating $\frac{ra}{r}$. (3 marks) (5) Show that the area of a sector with angle θ , with radius r and arc length a can

CALCULATOR-ASSUMED

Question 6 continued

(3 marks)

Question 4 (5 marks)

6

A windshield wiper blade on a car window has a length of 36 cm and rotates through an angle of $\frac{17\pi}{18}$. See the diagram below.

(a) Determine the exact distance the far end of the wiper blade would travel.
(2 marks)

The closest part of the wiper blade does not clean the window as shown in the diagram above.

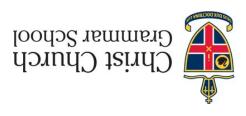

(b) If the distance from start of the wiper blade to the smaller arc is 6 cm, calculate the exact area of windshield that is cleaned. (3 marks)

c) Find the bearing of tower C from tower A.

Question 7 (3 marks)

5

Determine the size of the largest angle in a triangle with sides $15.2 \, \text{cm}$, $34.5 \, \text{cm}$, and $44.2 \, \text{cm}$. Give your answer in radians to 1 decimal place.

- 7. It is recommended that **you do not use pencil**, except in diagrams.

Question 5 (4 marks)

3

The line shown below passes through the point (0,0). Use the graph below to answer the questions that follow.

a) Determine the gradient of the line as an exact value.

b) The point (8,a) lies on the line. Determine the value of a as an exact value. (2 marks)
