Instructions to candidates

- Write your answers in this Question/Answer Booklet.
- Answer all questions.
- You must be careful to confine your response to the specific question asked and to follow any instructions that are specific to a particular question.
- 4. Supplementary pages for the use of planning/continuing your answer to a question have been provided at the end of this Question/Answer booklet. If you use these pages to continue an answer, indicate at the original answer where the answer is continued, i.e. give the page number.
- 5. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.
- 6. It is recommended that you do not use pencil, except in diagrams.

CALCULATOR-FREE

Question 1

(e marks)

(2 marks)

(a) Solve the following equation:

 $x \angle - = {}_{Z}x$

0= 14-247

(b) Solve the following equation exactly for x by completing the square:

(4 marks) $0 = 2 + x9 + x^2$

(mithes ASIA) TI + E-= X

Sining ray / Tr- 8- =x

MATHEMATICS METHODS Year 11

Question 2

(3 marks)

Solve the following equation:

$$\frac{x-3}{2} - \frac{2x-4}{3} - 5 = 0$$

$$6 \times \frac{2x-3}{2} - 6 \times \frac{2x-4}{3} - 5 = 0$$

$$6 \times \frac{2x-3}{2} - 6 \times \frac{2x-4}{3} - 6 \times 5 = 6 \times 0$$

$$3(x-3) - 2(2x-4) - 30 = 0$$

$$3(x-3) - 4x + 8 - 30 = 0$$

$$-x - 31 = 0$$

$$-x - 31 = 0$$

$$-x = 31$$

$$x = -3$$

Question 3

(2 marks)

Solve the following equation for x:

$$ax + b = cx + d$$

4

giving your answer for x in terms of a, b, c and d.

$$\alpha x - cx = d-5$$

$$x(a-c) = d-5 \qquad (hr haking out factor of x)$$

$$x = \frac{d-5}{a-c} \qquad (hr giving correct value of x)$$

Question 4

(4 marks)

Use the turning point and the y intercept to sketch a graph of

$$y = -2(x+1)^2 + 4$$

5

turning point = (-1,4) ~ (hor calculating nursing point)

(-1,4)

$$y = -2(0+1)^{2}+4$$

$$= -2+4 = 2$$

(her correctly displaying furning point)

(her correctly displaying yintercept)
