

Investigation 1 7102

Year 12 METHODS

Part One:

assumed section.

mportant note to candidates his investigation has 2 parts: a take home investigation that the student needs to esearch and complete at home, and an in-class validation that will be completed in test conditions during class.
Special items: drawing instruments, templates, and up to three calculators approved for use in the WACE examinations
To be provided by the candidate standing (including coloured), sharpener, standard items: pens (blue/black preferred), pencils (including coloured), sharpener, correction fluid/tape, eraser, ruler, highlighters
Materials required/recommended for this section To be provided by the supervisor This Question/Answer Booklet
Time allowed for this section: 2 weeks
Teacher name
Student name
ake home investigation

The in-class validation will comprise a calculator-free section and a calculator-

The in-class validation will be assessed and it constitutes 6% of the course mark.

The take home investigation will not be assessed; however, answers will be provided.

The take home investigation needs to be completed prior to the validation.

The in-class validation will be on Thursday 16 Feb 2017.

It is handed out on Thursday 2 Feb 2017. This paper is the take home investigation.

INVESTIGATION 1

Instructions to candidates

- 1. Write your answers in this Question/Answer Booklet.
- 2. Answer all questions.
- 3. Show all your working clearly. Your working should be in sufficient detail to allow your answers to be checked readily and for marks to be awarded for reasoning. Incorrect answers given without supporting reasoning cannot be allocated any marks. For any question or part question worth more than two marks, valid working or justification is required to receive full marks. If you repeat an answer to any question, ensure that you cancel the answer you do not wish to have marked.

2

4. It is recommended that **you do not use pencil**, except in diagrams.

Using a similar approach to Question 3, determine $\frac{d}{dx}\cos x$ from first principles.

The first few steps have been completed for you.

Learning Objectives

Aim of Investigation

At the end of this investigation, you should be able to:

DERIVATIVES OF TRIGONOMETRIC FUNCTIONS

• Establish the limit $\frac{\sin h}{h} \to 1$ as $h \to 0$ using inequalities, graphically and numerically

The aim of this investigation is determine the derivatives of $\sin x$ and $\cos x$ from first principles and apply the results established in routine differentiation problems.

- Establish the limit $\frac{1-\cos h}{h} \to 0$ as $h \to 0$
- Establish from first principles that $\frac{b}{x} (\sin x) = \cos x$
- Establish from first principles that $\frac{d}{dx}(\cos x) = -\sin x$
- Apply the derivatives of $\sin x$ and $\cos x$ in differentiation involving chain rule, product rule and quotient rule

Required Material

- 1. All the material contained in this booklet.
- All the material found in:A.J. Sadler, Mathematics Methods Unit 3, Pages 137 to 150

Instructions to Candidates

- 1. To achieve the objectives of this investigation and to prepare for the validation, students will have to work through all the notes and questions specified as Required Material.
- 2. Additional resources can be found in: O.T. Lee, WACE Revision Series, Mathematics Methods Year 12, Pages 45 –

 $\frac{x \cos - (x + x) \cos \frac{1}{n}}{\frac{1}{n}} = x \cos \frac{x}{n}$ $\frac{x \cos - x \sin x \sin x - \cos x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x - \sin x \sin x - \cos x}{n}$ $\lim_{n \to \infty} \frac{1}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \sin x \sin x}{n} = \lim_{n \to \infty} \frac{x \cos x \cos x}{n} = \lim_{n \to \infty} \frac{x \cos x}{n} = \lim_$

Question 5

The derivatives of $\sin x$ and $\cos x$ established in Questions 3 and 4 are used in the differentiation of terms involving chain rule, product rule, quotient rule.

Practise this application by attempting all the questions in A.J. Sadler, Mathematics Methods Unit 3, Pages 148 – 150, Exercise 7A

YEAR 12 METHODS

4

INVESTIGATION 1

This page has been left blank intentionally.

INVESTIGATION 1 21 **YEAR 12 METHODS**

Using the result from (c) and the limits established in Questions 1 and 2, determine $\frac{d}{dx}\sin x$ from first principles.

The first few steps have been completed for you.

$$\frac{d}{dx}\sin x = \lim_{h \to 0} \frac{\sin(x+h) - \sin x}{h}$$

$$= \lim_{h \to 0} \frac{\sin x \cos h + \cos x \sin h - \sin x}{h}$$

$$= \lim_{h \to 0} \left(\frac{\cos x \sin h}{h} - \frac{\sin x - \sin x \cos h}{h}\right)$$

$$= \lim_{h \to 0} \frac{\cos x \sin h}{h} - \lim_{h \to 0} \frac{\sin x - \sin x \cos h}{h}$$

$$= \cos x \lim_{h \to 0} \frac{\sin h}{h} - \sin x \lim_{h \to 0} \frac{1 - \cos h}{h} \qquad \text{since } \lim_{h \to 0} \frac{\sin h}{h} = 1, \lim_{h \to 0} \frac{1 - \cos h}{h} = 0$$

$$= \cos x (1) - \sin x (0)$$

$$= \cos x$$

The derivative of a function f(x) is found from first principles as follow:

$$\frac{q}{(x)f - (q+x)f} \stackrel{0 \leftarrow q}{\text{mil}} = (x)f \frac{xp}{p}$$

Write down the expansion for $\sin(A + B)$.

 $a \operatorname{nis} A \operatorname{soo} A \operatorname{nis} = (a + A)\operatorname{nis}$

Hence write down the expansion for $\sin(x + h)$.

 $y = x \cos x$

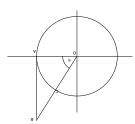

Using the results from (b), simplify the following expression

$$\frac{y}{x \operatorname{uis} - (y + x) \operatorname{uis}}$$

 $\frac{x \sin - u \sin x \cos + u \cos x \sin}{x} = \frac{x \sin - (u + x) \sin x}{x}$

Question 1

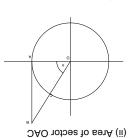

This diagram shows a unit circle. AB is a tangent to the circle and $\boldsymbol{\theta}$ is measured in radians.

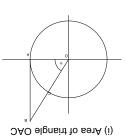

Write a trigonometric expression for |AB| in terms of heta, showing your reasoning.

On separate diagrams of the unit circle below shade in each of the indicated areas.

(iii) Area of triangle OAB

- Area of triangle OAC Write expression for each of the following areas in terms of $\boldsymbol{\theta}$.
- Area of sector OAC
- Area of triangle OAB

(d) Complete the table below calculating the areas of each shape to six decimal places:

$\begin{array}{c ccccccccccccccccccccccccccccccccccc$				
$\frac{\pi}{16}$ $\frac{\pi}{32}$ $\frac{\pi}{64}$ $\frac{\pi}{128}$	θ in radians	Area of triangle	Area of sector	Area of triangle
		OAC	OAC	OAB
$\frac{\pi}{32}$ $\frac{\pi}{64}$ $\frac{\pi}{128}$				
$\frac{\pi}{32}$ $\frac{\pi}{64}$ $\frac{\pi}{128}$	π			
$\frac{\pi}{32}$ $\frac{\pi}{64}$ $\frac{\pi}{128}$				
$\frac{\pi}{64}$ $\frac{\pi}{128}$	16			
$\frac{\pi}{64}$ $\frac{\pi}{128}$				
$\frac{\pi}{64}$ $\frac{\pi}{128}$				
$\frac{\pi}{64}$ $\frac{\pi}{128}$	π			
$\frac{\pi}{64}$ $\frac{\pi}{128}$	32			
$\frac{\pi}{128}$				
$\frac{\pi}{128}$				
$\frac{\pi}{128}$	π			
$\frac{\pi}{128}$	61			
128	04			
128				
128	_			
π	128			
π				
π				
	π			
256				

(e) Place in ascending order the expressions for the area of each shape (i.e. from smallest area to largest area)

(f) Use your results to show that: $\sin\theta < \theta < \tan\theta \text{ for } 0 < \theta < \frac{\pi}{2}$

(c) Hence, using the results from (b) and Question 1, show that

INVESTIGATION 1

$$\lim_{\theta \to 0} \frac{1 - \cos \theta}{\theta} = 0$$

$$\lim_{\theta \to 0} \frac{1 - \cos \theta}{\theta} = \lim_{\theta \to 0} \frac{\sin \theta}{\theta} \times \lim_{\theta \to 0} \frac{\sin \theta}{(1 + \cos \theta)} \qquad \text{from (b)}$$

$$= 1 \times \frac{\sin 0}{(1 + \cos 0)} \qquad \text{from Question 1}$$

$$= 1 \times 0 \qquad \qquad \text{since } \sin 0 = 0$$

$$= 0$$

.

tant wond (a)

$$\frac{\theta \sin^2 \theta}{(\theta \cos + 1)\theta} = \frac{\theta \cos - 1}{\theta}$$

$$\frac{\theta \cos^2 + 1}{\theta \cos^2 + 1} \times \frac{1 + \cos^2 \theta}{\theta \cos^2 + 1} = \frac{\theta \cos^2 - 1}{\theta \cos^2 + 1} = \frac{\theta \sin^2 \theta}{\theta \cos^2 + 1} = \frac{\theta \sin^2 \theta}{\theta \cos^2 + 1} = \frac{\theta \sin^2 \theta}{\theta \cos^2 + 1}$$

$$(\theta) g \min_{\theta \leftarrow \theta} \times (\theta) f \min_{\theta \leftarrow \theta} = (\theta) g(\theta) f \min_{\theta \leftarrow \theta} \text{ that line is in the properties} \qquad ($$

Use this information and the result from (a), show that

$$\frac{\theta \operatorname{niz}}{\theta \operatorname{soo} + 1} \min_{0 \leftarrow \theta} \times \frac{\theta \operatorname{niz}}{\theta} \min_{0 \leftarrow \theta} = \frac{\theta \operatorname{soo} - 1}{\theta} \min_{0 \leftarrow \theta}$$

Use the table of values in (d) to compare the areas of each figure as $\theta \to 0$, and comment on their results.

 $1 > \frac{\theta \operatorname{niz}}{\theta} > \theta \operatorname{soo} \qquad \text{(ii)}$

 $\frac{1}{\theta \cos s} > \frac{\theta}{\theta \sin s} > 1$ (i)

(g) Use the result from (f) to establish the following inequalities:

See next page

from (a)
$$\frac{\theta^{2} \sin \theta}{(\theta \cos^{2} + 1)\theta} \lim_{\theta \leftarrow \theta} \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta} \lim_{\theta \leftarrow \theta} \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta} \lim_{\theta \leftarrow \theta} \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

$$\frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta} = \frac{\theta}{\theta \cot \theta}$$

 $\frac{\theta \operatorname{niz}}{(\theta \operatorname{sos} + \Gamma)} \min_{0 \leftarrow \theta} \times \frac{\theta \operatorname{niz}}{\theta} \min_{0 \leftarrow \theta} =$

YEAR 12 METHODS

8

INVESTIGATION 1

(i) Consider the value of $\cos\theta$ as $\theta\to 0$. Using the results established so far, deduce the limit that $\frac{\sin\theta}{\theta}$ approaches as $\theta\to 0$.

(j) Validate your results by completing the table of values below.

θ	$\frac{\pi}{32}$	$\frac{\pi}{64}$	$\frac{\pi}{128}$	$\frac{\pi}{256}$
$\cos \theta$				
$\frac{\sin \theta}{\theta}$				

(k) Write your conclusion for the following limit:

$$\lim_{\theta \to 0} \frac{\sin \theta}{\theta} =$$

INVESTIGATION 1 17 YEAR 12 METHODS

(i) Consider the value of $\cos\theta$ as $\theta\to 0$. Using the results established so far, deduce the limit that $\frac{\sin\theta}{\theta}$ approaches as $\theta\to 0$.

From (g)(ii),
$$\cos \theta < \frac{\sin \theta}{\theta} < 1$$
As $\theta \to 0$, $\cos \theta \to 1$

$$\cos \theta < \frac{\sin \theta}{\theta} < 1 \quad \text{becomes} \quad 1 < \frac{\sin \theta}{\theta} < 1$$

$$\Rightarrow \frac{\sin \theta}{\theta} \to 1$$

(j) Validate your results by completing the table of values below.

θ	$\frac{\pi}{32}$	$\frac{\pi}{64}$	$\frac{\pi}{128}$	$\frac{\pi}{256}$
$\cos \theta$	0.995185	0.998795	0.999699	0.999925
$\frac{\sin\theta}{\theta}$	0.998394	0.999598	0.999900	0.999925

(k) Write your conclusion for the following limit:

$$\lim_{\theta \to 0} \frac{\sin \theta}{\theta}$$

$$\lim_{\theta \to 0} \frac{\sin \theta}{\theta} = 1$$

INVESTIGATION 1

Question 2

Show that
$$\theta \cos - 1$$

$$\frac{\theta \sin \theta}{(\theta \cos \theta + 1)\theta} = \frac{\theta \cos \theta - 1}{\theta}$$

$$\text{(d)} \quad \text{it is given that } \lim_{\theta \to 0} f(\theta)g(\theta) = \lim_{\theta \to 0} f(\theta) \times \lim_{\theta \to 0} g(\theta).$$

Use this information and the result from (a), show that

$$\frac{\theta \operatorname{niz}}{\theta \operatorname{200} + 1} \min_{0 \leftarrow \theta} \times \frac{\theta \operatorname{niz}}{\theta} \min_{0 \leftarrow \theta} = \frac{\theta \operatorname{200} - 1}{\theta} \min_{0 \leftarrow \theta}$$

Use the result from (f) to establish the following inequalities: $\frac{1}{\theta \cos 2} > \frac{\theta}{\theta \sin 2} > 1 \qquad (i)$

$$\theta$$
 net $> \theta > \theta$ niz

$$\frac{1}{\theta \cos s} > \frac{\theta}{\theta \sin s} > 1 \qquad \Leftrightarrow \quad \theta \sin \theta \text{ throughouth gnibivib}$$

All terms in the above inequality are positive since $\theta>0$

$$\frac{1}{\theta \sin > \theta \cos \leftarrow \frac{1}{\theta \sin > \theta \sin }} > \frac{\theta}{\theta \sin } > 1 \quad \Leftarrow \quad \frac{1}{\theta \sin } > \frac{\theta}{\theta \sin } > 1$$

$$1 > \frac{\theta}{\theta \sin } > \frac{1}{\theta \sin } > \frac{\theta}{\theta \sin } > 1$$

$$1 > \frac{\theta}{\theta \sin } > \frac{\theta}{\theta \sin } > 1$$

 $1 > \frac{\theta \text{ nis}}{\theta} > \theta \text{ soo , esched}$

 $1 > \frac{\theta \text{ mis}}{\theta} > \theta \text{ soo} \qquad \text{(ii)}$

Use the table of values to compare the areas of each figure as heta o 0, and comment on their results

 $0 \leftarrow \theta \text{ sA}$

Area of triangle OAC < Area of sector OAC < Area of triangle OAB

And, Area of triangle OAC → Area of sector OAC → Area of triangle OAB

(c) Hence, using the results from (b) and from Question 1, show that

$$\lim_{\theta \to 0} \frac{1 - \cos \theta}{\theta} = 0$$

(d) Complete the table below calculating the areas of each shape to six decimal places:

θ in radians	Area of triangle	Area of sector	Area of triangle
	OAC	OAC	OAB
			37.12
	Area = $\frac{1}{1} \times 1^2 \times \sin \frac{\pi}{1}$	Area = $\frac{1}{1} \times 1^2 \times \frac{\pi}{1}$	Area = $\frac{1}{x} \times 1 \times \tan \frac{\pi}{x}$
$\frac{\pi}{}$	2 16	2 16	2 16
16		- 10	
	= 0.097545	= 0.098175	= 0.099456
π			
	0.049009	0.049087	0.049246
32			
$\frac{\pi}{}$	0.024534	0.024544	0.024563
64	0.021001	0.021011	0.021000
π	0.040074	0.040070	0.040074
128	0.012271	0.012272	0.012274
120			
1			
_			
<u>π</u>	0.006136	0.006136	0.006136
256			

 Place in ascending order the expressions for the area of each shape (i.e. from smallest area to largest area)

Area of triangle OAC < Area of sector OAC < Area of triangle OAB

$$\frac{1}{2}\sin\theta < \frac{1}{2}\theta < \frac{1}{2}\tan\theta$$

(f) Use your results to show that:

INVESTIGATION 1

$$\sin\theta < \theta < \tan\theta$$
 for $0 < \theta < \frac{\pi}{2}$

Multiply the inequality in (e) throughout by 2,

$$\sin \theta < \theta < \tan \theta$$

where
$$\angle AOC = \theta$$
 and $0 < \theta < \frac{\pi}{2}$

Question 3

The derivative of a function f(x) is found from first principles as follow:

$$\frac{y}{(x)f - (y+x)f} \stackrel{0 \leftarrow y}{\text{mil}} = (x)f \frac{xp}{p}$$

Write down the expansion for sin(A + B).

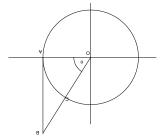

b) Hence write down the expansion for
$$\sin(x+h)$$
.

$$\frac{q}{x \text{ uis} - (q + x) \text{ui}}$$

Solutions

Question 1

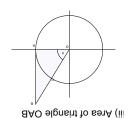

This diagram shows a unit circle. AB is a tangent to the circle and θ is measured in radians.

Write a trigonometric expression for |AB| in terms of θ , showing your reasoning.

$$1 = 0$$
 A since $\frac{a_{h}}{1} = \theta$ not
$$\theta \text{ not} = 8 \text{A.s.uT}$$

On separate diagrams of the unit circle below shade in each of the indicated areas.

Write expression for each of the following areas in terms of $\boldsymbol{\theta}$.

AAO elgonsint to senA (iii) AAO notbes to senA (ii) AAO elgonsint to senA (i)
$$\theta \operatorname{nist} \times \mathbb{I} \times \mathbb{I} \times \frac{1}{\zeta} = \operatorname{senA} \qquad \theta \times \mathbb{I} \times \mathbb{I} \times \frac{1}{\zeta} = \operatorname{senA} \qquad \theta \operatorname{nis} \times \mathbb{I} \times \mathbb{I} \times \frac{1}{\zeta} = \operatorname{senA}$$

$$\theta \operatorname{nist} \times \mathbb{I} \times \mathbb{I} \times \frac{1}{\zeta} = \operatorname{senA} \qquad \theta \operatorname{nist} \times \mathbb{I} \times \mathbb{I} \times \frac{1}{\zeta} = \operatorname{senA}$$

$$\theta \operatorname{nist} \times \mathbb{I} \times \mathbb{I} \times \mathbb{I} \times \frac{1}{\zeta} = \operatorname{senA}$$

$$\theta \operatorname{nist} \times \mathbb{I} \times$$

Using the result from (c) and the limits established in Questions 1 and 2, determine $\frac{d}{dx}\sin x$ from first principles.

The first few steps have been completed for you.

$$\frac{d}{dx}\sin x = \lim_{h \to 0} \frac{\sin(x+h) - \sin x}{h}$$

$$= \lim_{h \to 0} \frac{\sin x \cos h + \cos x \sin h - \sin x}{h}$$

$$= \lim_{h \to 0} \left(\frac{\cos x \sin h}{h} - \frac{\sin x - \sin x \cos h}{h}\right)$$

$$= \lim_{h \to 0} \left(\frac{\cos x \sin h}{h} - \frac{\sin x - \sin x \cos h}{h}\right)$$

YEAR 12 METHODS INVESTIGATION 1

Question 4

Using a similar approach to Question 3, determine $\frac{d}{dx}\cos x$ from first principles.

The first few steps have been completed for you.

$$\frac{d}{dx}\cos x = \lim_{h \to 0} \frac{\cos(x+h) - \cos x}{h}$$

$$= \lim_{h \to 0} \frac{\cos x \cos h - \sin x \sin h - \cos x}{h}$$

$$= \lim_{h \to 0} \left(\frac{\cos x \cos h - \cos x}{h} - \frac{\sin x \sin h}{h}\right)$$

Question 5

The derivatives of $\sin x$ and $\cos x$ established in Questions 3 and 4 are used in the differentiation of terms involving chain rule, product rule, quotient rule.

Practise this application by attempting all the questions in A.J. Sadler, Mathematics Methods Unit 3, Pages 148 - 150, Exercise 7A
