## A COLLEGE OF THE UNITING CHURCH IN AUSTRALIA BRESBALERIVN INDIES, COFFECE

## ATHEMATICAL METHODS YEAR 12 - TEST 2 **TNAMENATICS DEPARTMENT**

DATE: 2nd March 2016

Reading Time: 3 minutes

WORKING TIME: Maximum 30 minutes

31 marks

pens, pencils, pencil sharpener, highlighter, eraser, ruler, SCSA formula sheet (provided) EQUIPMENT:

SECTION TWO: CALCULATOR ASSUMED

WORKING TIME: Minimum 20 minutes

**EQUIPMENT:** 19 marks :JATOT

pens, pencils, pencil sharpener, highlighter, eraser, ruler, drawing instruments, templates, up to 3 calculators, formula sheet (provided).

one A4 page of notes (one side only)

Question 1

(19 marks)

(2 marks)

(a) Determine the following, writing your answers with positive indices and simplifying where possible.

(i) 
$$\frac{dy}{dx}$$
 if  $y = x^3 + e^{2x}$ 

$$\frac{dy}{dx} = 3x^2 + \lambda e^{2x}$$

(ii) 
$$\int 8xe^{x^2}dx$$
 (2 marks)
$$= 4e^{x^2} + C$$

(iii) 
$$\int (e^{2x} + e^{-2x})^2 dx$$
 (3 marks)  

$$= \int (e^{2x} + e^{-2x})(e^{2x} + e^{-2x}) dx$$

$$= \int (e^{4x} + 2e^{0} + e^{-4x}) dx$$

$$= \frac{e^{4x}}{4} + 2x + \frac{e^{-4x}}{-4} + C$$

$$= \frac{e^{4x}}{4} + 2x - \frac{1}{4e^{4x}} + C$$

Question 1 continued on next page ...

... beunifnoo 1 noitseuQ

(2 marks)

(2n)
$$x_{3x} = \sqrt{1 + \frac{4b}{xb}} \quad (v)$$

$$x_{3x} = \sqrt{1 + \frac{4b}{x$$

(2 marks)

(b) (i) Determine 
$$\frac{d}{dx} \int_{1}^{x} 8u(x^{2}-2)^{3} dx$$
 =

(4 marks)

(ii) Evaluate exactly 
$$\int_{0}^{2x} \frac{e^{2x} - e^{2x}}{e^{x}} dx$$

$$= \int_{0}^{2x} - e^{x} dx$$

$$= \int_$$

Question 1 continued on next page ...

Question 1 continued ...

(iii) Evaluate exactly 
$$\int_{\alpha}^{2a} \left(pe^{px+q} + 2pxe^{px^2}\right) dx \qquad (4 \text{ marks})$$

$$= \left[e^{px+q} + e^{px^2}\right]_{-\infty}^{2\alpha}$$

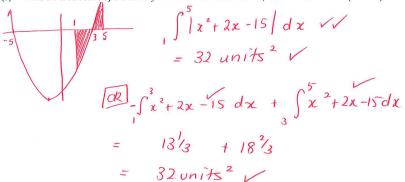

$$= \left[e^{px+q} + e^{px^2}\right]_{-\infty}^{2\alpha}$$

$$= e^{p(2\alpha)+q} + e^{p(2\alpha)^2} - \left(e^{p\alpha+q} + e^{p\alpha^2}\right)$$
There okay
$$= e^{2p\alpha+q} + e^{4p\alpha^2} - e^{p\alpha+q} - e^{p\alpha^2}$$

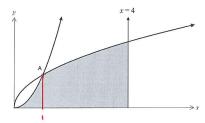

Question 6

(6 marks)

(a) Find the area bound by the curve  $y = x^2 + 2x - 15$  between x = 1, x = 5 and the x-axis. (3 marks)

(b) The curves  $y = ax^2$  and  $y = a\sqrt{x}$  intersect at the point A (1, a) as shown in the diagram below.

If the shaded area is equal to one square unit, find the value of *a*.

(3 marks)

$$\int ax^{2} dx + \int a\sqrt{x} dx = 1$$

$$\left[\frac{ax^{3}}{3}\right]_{0}^{1} + \left[\frac{2ax^{3/2}}{3}\right]_{1}^{4} = 1$$

$$\frac{9}{3} + \frac{16a}{3} - \frac{2a}{3} = 1$$

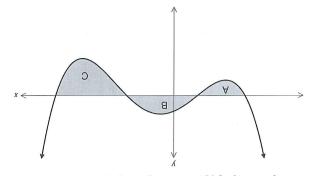

$$\alpha = 0 \cdot 2$$
End of Test

4

(6 marks)

Question 2

Consider the following function, y = f(x), with x-intercepts at -3, -1, 2 and 5.

Use the graph above to determine the following definite integrals. The area of A is 3 cm², B is 6 cm² and C is 10 cm².

(a) 
$$\int_{\xi_{-}}^{\xi_{-}} f(x) dx = -3 + \xi_{-} = xp(x) \int_{\xi_{-}}^{\xi_{-}} f(x) dx$$

(yiem f) 
$$0/+3-6 = 3b(x)f^{-\frac{1}{2}}$$
 (o)

(shem 2) 
$$3 + 4 \times 5 = xb (t + (x)t) \int_{t^{-}}^{t} (b)$$

(Aliem 1) 
$$\sqrt{4-2} = xb(x-)t^{2}$$
 (a)

Guestion 5 (6 marks)

the time in seconds, provided that  $t \ge 0.2$  seconds. It is known that when t = 2, the current is 150 amps. The amount of current in a circuit, I(t) amps, decreases in accordance with the rule  $\frac{dI}{dt} = \frac{100}{l^2}$  where t is

(5 marks) Determine a formula for the current at any time,  $t \ge 0.2$  seconds.

$$001 + \frac{7}{001} = I'$$

$$001 = 0 = 0$$

$$0SI = I' = 7$$

$$001 = \frac{7}{1-7001} = I$$

$$0 = \frac{7P}{IP}$$

(1 mark) (b) Find the current after 20 seconds

(5 marks) Determine the amount of current lost during the fifth second.

(d) Describe what happens to the current as t→∞.

Question 3

(6 marks)

A curve has equation  $y = x^2 e^{-x}$ . Show that  $\frac{dy}{dx} = ax^b e^{-x}(c-x)$ , giving the values of a, b and c.

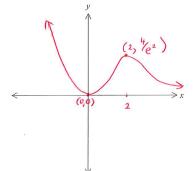

Sketch the graph on the axes below. Clearly show the exact location of any turning points, intercepts and asymptotes.

$$\frac{dy}{dx} = \chi^{2}(-e^{-x}) + 2\chi e^{-x}$$

$$= \chi e^{-x}(2-\chi)$$

$$\frac{S4.P4s}{0 = xe^{-x}(2-x)}$$

$$\begin{cases} x = 0 & \text{or } x = 2 \\ y = 0 & \text{if } y = \frac{4}{e^2} \end{cases}$$

As  $x \to \infty$ ,  $y \to 0$ 

Vshape VTP's Vasymptote

Question 4

(7 marks)

Students at the University of Sydney observed the number of possums in a nearby area of bushland. It was known that the original population when they commenced observation in January 2010 was approximately 250. The population of possums was found to be growing such that  $\frac{dP}{dt} = 0.05P$ .

(a) Write an equation that can be used to determine the number of possums, t years after the initial observations by the students. (2 marks)

(b) Determine the population of possums in July 2015.

(2 marks)

$$t = 5.5$$
 P = 250 e 0.05 (5.5)  
= 329.1326...  
 $\approx 329 \text{ possems}$  (330 okay)

(c) Determine, to the nearest month, when the number of possums will first exceed 400. (3 marks)
