Questions 1

(7 marks)

Find the derivatives of the following. Do not simplify your answer.

(a) 
$$\ln \left[ 2x^3 - 3x^2 + 4x - 1 \right]^3$$

(2 marks)

(b) 
$$e^{x} \ln (x)$$

(2 marks)

(c) 
$$\ln(x)\cos(x) + \frac{\sin(x)}{x}$$

(3 marks)

## Question 2

(5 marks)

(a) Use Polynomial Long division to simplify  $\frac{x^2-2x+5}{x-3}$ .

(3 marks)

(b) Hence find  $\int \frac{x^2 - 2x + 5}{x - 3} dx$ .

(2 marks)

Solve the value for t if  $t = 3\log_2 10 + \log_2 \left(\frac{2+t}{3}\right)$ . (2 marks)

(b) It is found by observation that the model for *Cutus pius* does not quite work. It is known that the model for the population of *Asla bible* is satisfactory. The form of the model for *Cutus pius* is  $N_C(t) = 8000 + c \times 2^t$ . Find the value of c, correct to two decimal places, if it is known that  $N_A(15) = N_C(15)$ . (2 marks)

₽ Js∋T

Question 3 (5 marks)

(a) Find the constants 
$$a$$
 and  $b$  given that for  $\{x \in R: x \neq z, x \neq -3\}$ . (3 marks) 
$$\frac{a}{x-x} + \frac{b}{x} = \frac{x+8}{x-x} = \frac{a}{8} + \frac{b}{x-x} = \frac{a}{8}$$

(S marks)

(d) Hence find  $\int \frac{8+x}{3-x+^2x} \int dx$ 

Question 7 (8 marks)

There are two species of insects living in a suburb: the Asla bibla and the Cutus pius. The number of Ala bibla alive at time t days after 1 January 2000 is given by

$$21 \ge 1 \ge 0.10001 + 00001 = (1)_{A} N$$

The number of Cutus pius alive at time t days after 1 January 2000 is given by

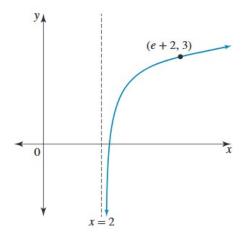

Year 12 Methods

$$N_{\rm C}(t) = 8000 + 3 \times 2^t, 0 \le t \le 15$$

(a) (b) Show full reasoning that 
$$N_{\rm A}(t) = N_{\rm C}(t)$$
 if and only if  $t = 3\log_2 10 + \log_2 \left(\frac{2+t}{3}\right)$ . (4 marks)

Question 4 (2 marks)

The rule for the function shown is  $y = \ln(x - m) + n$ . Find the values of m and n.

Question 5 (3 marks)

Solve the following equations for x. Show full algebraic reasoning.

$$3e^{2x}-5e^x-2=0$$

Question 6 (5 marks)

Test 4

The graph of the function with the rule  $y=3\log(x+1)+2$  intersects the axes at the point (a,0) and  $\dot{a}$ ). Find the exact values of a and b. Show full algebraic reasoning.
